Award Description*

Design, develop, and implement statewide P-20 longitudinal data systems to capture student data from preschool to high school, college, and career.

In addition, improvements and extensions to the existing LDS will be made that will bring the system capabilities for data collection, analysis, and reporting - at both the state and district level - in line with the attributes of a comprehensive longitudinal data system. The three goals and the associated nine outcomes of the grant include the following:

Integrate key data into the P-20 Data Warehouse to better understand students¿ preparedness to contribute to the twenty-first century workforce
1. Load existing college readiness test score collections into the LDS
2. Expand the LDS to include pre-K, kindergarten and workforce data

Alleviate Data Collection Burden on Districts and Improve Data Quality
3. Realign statewide data collection standards and protocols for districts
4. Expand the architecture to support new standards and collection platform
5. Automate data collection through development of a state-sponsored SIS
6. Develop data services and loading the District Connections Database
7. Create District Connections Database extract certification and validation tools

Build Performance Management Culture that Uses Data to Continuously Improve Performance
8. Develop timely, relevant reports and user-friendly tools for stakeholders
9. Ensure compliance with Federal reporting and SFSF requirements
The system will leverage five major system components to accomplish these goals:
1. District connections database (DCD);
2. Certified Public Education Information Management System (PEIMS) data store;
3. TPEIR;
4. Business intelligence tools; and
5. Voluntary state-sponsored student information system (SIS).

The end result of TEA's efforts will be a practical and powerful statewide data solution that will increase the availability of data to support the state's educational improvement efforts.

1.33	The positions created or retained during this period included professional jobs. Job categories include systems analysts and managers. Number of characters entered: 135	

Quarterly Activities/Project Description*
1.0 Load existing SAT, ACT, & AP test score collections into Texas PK-16 Public Education Information Resource (TPEIR) Longitudinal Data System (LDS). Initiation and planning of this work has started, the Memorandum of Understanding (MOU) with the test companies is in place. (In Progress) 2.1 Expand TWC (Texas Workforce Commission) data link in TPEIR to include dropouts & high school graduates not attending college. The data is available through an existing agreement. (In Progress) 3.0 Realign the statewide Public Education Information Management System (PEIMS) data collection standards and protocol for districts. Developing the data standards and the data requirements for the Agency District Connections Database (DCD). (In Progress) 4.0 Expand architecture to support new standards & collection platform. Analyzing of the requirements for Cognos and database licenses. Analyzing the infrastructure to support the DCD for both the pilot and production level implementation perspectives. (In Progress) 4.2 Analyzing and developing requirements for the Identity and Access Management (IAM) migration. (In Progress) 6.0 Develop data services & load DCD. Developing requirements for the DCD data services. Reviewing the DCD pilots. (In Progress) 8.0 Develop timely, relevant reports & user-friendly tools for stakeholders on key policy/program areas including: college readiness, high school graduation, teacher effectiveness, educator preparation, & postsecondary success. Stakeholder workgroups are being planned and convened to collect requirements for reports & identify desired measures. (In Progress) 9.0 Develop a data collection to include aggregate performance evaluation data on teachers & principals. The data collection tool has been delivered by Region 13 to TEA. TEA has completed acceptance testing. Local Education Agencies (LEA's) have been trained. The survey tool has been deployed to districts and data collection is open. (In Progress)
