WHAT IS STAAR MODIFIED?

The State of Texas Assessments of Academic Readiness (STAAR) is the testing program for students in Texas public schools. The assessments are based on the Texas Essential Knowledge and Skills (TEKS), the state-mandated curriculum. The curriculum contains the content and skills students need to learn in order to be successful in the current grade and to make academic progress from year to year. STAAR Modified, an alternate assessment based on modified academic achievement standards, is one component of the STAAR program. STAAR Modified is intended for a small number of students receiving special education services who have a disability that significantly affects academic progress in the grade-level TEKS and who meet specific participation requirements. Each STAAR Modified assessment measures the grade-level TEKS, but the test design (e.g., fewer test questions and answer choices, simpler vocabulary and sentence structure) and test format (e.g., larger point size, fewer questions per page) have been modified to meet the special needs of the students for whom it is intended.

WHAT IS THE PURPOSE OF THIS PARENT GUIDE?

Every child who takes a STAAR test gets a report showing his or her test results. This report is called the Confidential Student Report, or CSR for short. Carefully reviewing your child's test results can help you identify where your child is doing well and where he or she may need to improve.

This parent guide is based on a sample CSR for grade 7. You will notice that the grade 7 CSR on the next page shows test results for three subject areas: reading, mathematics, and writing. If your child took these subject-area tests at a different grade, his or her results will be reported in the same way as they are at grade 7. If your child took a science or social studies test, his or her test results will be reported in a similar way as the results for reading and mathematics. So no matter what grade your child is in, this grade 7 sample report will help you understand your child's actual test results.

WHAT ARE THE PERFORMANCE LEVELS FOR STAAR MODIFIED?

The STAAR Modified assessments have three categories for performance. The categories are Level III: Advanced Academic Performance, Level II: Satisfactory Academic Performance, and Level I: Unsatisfactory Academic Performance. Your child's performance level is indicated for each assessment he or she took.

If your child's report shows a "YES" under Advanced Performance, he or she performed at a level that was well above passing. Performance in this category indicates that students are well prepared for the next grade with instructional modifications and are highly likely to be successful in that grade with continued modifications and support.

If your child received a "NO" under Advanced Performance but a "YES" under Satisfactory Performance, he or she performed at a level that was at or above passing. Performance in this category indicates that students are sufficiently prepared for the next grade with instructional modifications and are reasonably likely to be successful in that grade with continued modifications and support.

If your child's report shows a "NO" under Satisfactory Performance, he or she performed at a level that was below passing. Performance in this category indicates that students are not adequately prepared for the next grade even with instructional modifications and are not likely to succeed in that grade without significant and/or additional modifications and increased support.

Explanation of Results

A **Reporting Categories**
The content and skills tested on each STAAR Modified assessment are grouped together. Each group is called a reporting category. The categories for each subject are listed in this column.

B **Items Correct and Items Tested**
The Items Correct column shows the number of questions your child answered correctly for each reporting category. The Items Tested column shows the total number of questions tested for each reporting category.

C **Percent Correct**
The shaded bars show the percentage of questions your child answered correctly for each reporting category.

D **Writing Performance Results**
On the writing test, your child wrote a composition and answered multiple-choice questions related to revision and editing. In addition to the number and percent of multiple-choice questions your child answered correctly, your child's score on the composition is shown. For the written composition section of the writing results, the first column lists the type of composition your child wrote. The second column shows the points your child earned on the composition. The third column shows the total points possible on the composition. The final column describes the score, showing the level of writing performance your child demonstrated on the composition.

E **Student's Scale Score**
This is your child's scale score, which shows his or her performance on the test. The STAAR Modified scale score lets you compare your child's score with the Satisfactory and Advanced performance levels. The scale score indicates how far above or below these performance levels your child's achievement is.

Document# 9999-99999

For more information about the STAAR tests, contact your child's school. mmddyy-ZZZZZZZZ-CCCCCCCCC-SSSSSSS

F **Test Information**
This column shows whether your child took a specific version of a STAAR test. Different letters indicate different versions: ***s*** for STAAR Spanish, ***l*** for STAAR L, ***m*** for STAAR Modified, and ***b*** for braille. If there is not a letter in this column, your child took the general version of the STAAR assessment.

G **Satisfactory Performance and Advanced Performance**
To the right of the scale score, the "YES" or "NO" shows whether your child achieved Satisfactory Performance or Advanced Performance on the test.

H **Scale Score Bar**
This bar shows how well students could perform on the test. The arrow shows where your child actually performed on the test. The scores needed to achieve Satisfactory Performance and Advanced Performance are also marked on the scale score bar.

I **Student Data Portal**
Through the student data portal, parents and students can access assessment information across test administrations and years. You may access the portal by using the web address and student access code that are listed at the bottom of your child's actual test report.
