Methodology: We extracted employment records from the Public Education Information Management System (PEIMS) database for all principals ([PEIMS](#)) regardless of their full-time equivalencies for the academic years reported. We merged employment data with the gender and race / ethnicity data using the PEIMS demographic tables. We report race / ethnicity categories based on guidance from the U.S. Department of Education in 2007. In this approach, Hispanic ethnicity data are collected separately from race data. These two pieces of information are used to determine the following categories: Hispanic or Latino, American Indian / Alaska Native, Asian, Black or African American, Pacific Islander, White, or Two or More Races / Ethnicities.

Note: TEA collects all employment and demographic data stored in PEIMS from local education agencies. TEA maintains this data separately from the self-reported demographic data located in the Educator Certification Online System (ECOS). The two demographic data collections are similar but not identical categories. Demographic data may differ between PEIMS and ECOS. Users of this report should consider this when comparing data in this table with data in other reports concerning demographic data of educators.
