Introduction

Introduction

District and Campus Listings by County

This report provides SAT I and ACT participation and performance results by campus, district, district characteristic, and state as a supplement to *College Admissions Testing of Graduating Seniors in Texas High Schools, Class of 2003* (TEA, 2004). The first three listings display summary data for each Texas public school campus and district, organized by county.

Table 1 includes, for each district and campus: (a) the average SAT I Mathematics, Verbal, and Combined scores of SAT I examinees in the class of 2003; (b) the number of graduates who took the SAT I; (c) the total number of graduates and the percentage of graduates who tested; and (d) the number and percentage of examinees with SAT I Combined scores of 1110 or higher. Table 2 contains the same information for ACT English, Mathematics, Reading, Science, and Composite results.

Table 3 contains information for the Academic Excellence Indicator System (AEIS) indicators based on results for either the SAT I or ACT. Included in Table 3 are: (a) the number of SAT I- and/or ACT-tested graduates; (b) the total number of graduates; (c) the percentage of graduates who took the SAT I and/or ACT; and (d) the number and percentage of examinees scoring at or above the criterion on either test.

In Tables 1-3, SAT I and ACT participation and performance data for districts and campuses with fewer than 5 graduates are removed to protect student confidentiality. This precaution ensures that single sets of scores cannot be identified or linked with any individual. In these cases “<5t” appears in place of the actual value, with “t” referring to a small number of students tested. In addition, districts and campuses with five or more examinees but fewer than five scores of 1110 or above for SAT I or 24 or above for ACT receive the note, “<5h.” When it is possible for these score data to be arithmetically inferred from other district- or campus-level data, additional masking is employed using intervals of 5 students, and a note such as the following appears: “<10m,” “<15m,” “<20m,” etc.

College Admissions Examinations by District Characteristic

In the final table, SAT I and ACT results have been summarized by a variety of district characteristics. For each of 25 district characteristics, Table 4 shows: (a) the mean SAT I Combined score; (b) the mean ACT Composite score; (c) the percentage of graduates tested on the SAT I and/or the ACT; and (d) the percentage of examinees scoring at or above criterion in 2003. In addition, these four values are presented for the state as a whole and provided at the bottom of each page.

Information on the 25 district characteristics is based on data from TEA’s Public Education Information Management System (PEIMS). Characteristics include student enrollment, district type, the percentage of students passing TAAS, and the percentage of teachers with an advanced degree. Although the number of subcategories within each characteristic is consistent from year to year, the

range represented by a subcategory may change. All data on Table 4 are for the 2003 graduating class, with the exception of college admissions data, which lag one year behind.

Texas Education Agency

District Characteristic Descriptions, 2002-03

Enrollment

Districts are grouped by size into nine subcategories based on their number of students in membership. This is the total number of students in membership in the district on a day in late October of each year. It does not include students who are served by the district but are not in membership in the serving district.

District Type

Districts are classified on a scale ranging from major urban to rural. The charter school districts are in a separate subcategory. Factors such as size, growth rates, student economic status, and proximity to urban areas are used to determine the appropriate group. The groups are:

Major Urban

The largest school districts in the state that serve the six metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, and El Paso. A district is designated major urban if it is the largest in counties with populations of 650,000 or over, and there are at least 35% low-income students in the school district. Or, if not the largest district in the county, the number of students in membership is 75% of the largest district and there are at least 35% low-income students in the district.

Major Suburban

Other school districts in and around the major urban areas. A district is major suburban if it is contiguous to a major urban district and the number of students in membership is at least 3% of the major urban district or an enrollment of at least 4,500. If a district is not contiguous to a major urban area, then it must be within the same county and have an enrollment of 15% of the major urban district or an enrollment of at least 4,500 in order to be classified as major suburban.

Other Central City

The major school districts in other large Texas cities. If the district is not contiguous to one of the major urban districts but the county population is between 100,000 and 650,000 and it is the largest district in the county or its population is 75% of the largest district then the district is designated as other central city.

Other Central City Suburban

Other school districts in and around the other large, but not major, Texas cities. If the district is in a county between 100,000 and 650,000 population and the number of students in membership is at least 15% of the largest district in the county then it is designated central city suburban. If a district is contiguous to a central city district, its population is greater than 3% of that district's, and the number

of students in membership is greater than the corresponding median figure for the state, it is also central city suburban.

Independent Town

If the district is the largest in a county having a population of 25,000 to 100,000, or the number of students in membership is greater than 75% of the largest district, the district is considered an independent town.

Non-Metro: Fast Growing

The school districts that fail to be in any of the above subcategories and that exhibit a five-year growth rate of at least 20 percent. These districts must have at least 300 students in membership.

Non-Metro: Stable

The school districts that fail to be in any of the above subcategories, yet the number of students in membership exceeds the state median of 704.5.

Rural

The school districts that fail all of the above tests for placement into a subcategory. These districts either have a growth rate less than 20 percent and the number of students in membership is between 300 and the state median of 704.5, or the number of students in membership is less than 300.

Charter Schools

The 185 open-enrollment schools granted a charter by the State Board of Education for operation during 2002-2003. Open-enrollment charter schools operate in a facility of a commercial or nonprofit entity or a school district.

Property Wealth

Wealth is defined as total taxable property value divided by the total number of students and is used as an indicator of a district's ability to raise local funds on a per pupil basis. The property value used is total taxable value for the last completed calendar year, i.e., 2002, as determined by the Comptroller's Property Tax Division (CPTD). This taxable value is the traditional measure of value, not the alternative value which may be used in state funding formulas. The total number of students is for the current school year, i.e., 2002-2003. The first wealth grouping classifies districts into ten subcategories with approximately equal numbers of districts in each, called deciles. The second grouping simply shows districts above and below state average wealth. The third wealth grouping classifies districts into 20 subcategories with approximately equal numbers of students in each. The six special statutory and 185 charter school districts form a separate group in all three categories because they have no taxable property wealth.

Locally Adopted Tax Rates

Districts are grouped into four tax effort subcategories, or quartiles, with approximately equal numbers of districts in each. This category shows the total adopted tax rate, as reported by the CPTD office. The six special statutory and 185 charter school districts are in a separate subcategory because they do not levy property taxes.

Local Maintenance and Operations Tax Rates

Districts are grouped into four tax effort subcategories, or quartiles, with approximately equal numbers of districts in each. This category shows the maintenance and operation (M&O) adopted tax rate, as reported by the CPTD office. The M&O levy includes money generated by districts for equalizing wealth. The six special statutory and 185 charter school districts form a separate group in both categories because they do not levy property taxes.

Highest Property Value Category

Currently, the Comptroller's Property Tax Division (CPTD) classifies property into multiple subcategories based on how the property is used. These subcategories are aggregated into four classifications as follows:

- Residential: Single-family and multi-family residential, and residential inventory
- Land: Vacant lots, and rural real (taxable)
- Oil and Gas: Oil, gas, and minerals
- Business: Commercial and industrial real, commercial and industrial personal, and utilities

The one subcategory of these four which has the greatest total property value for a district determines in which category the district is placed. The six special statutory and 185 charter school districts form a separate group because they have no taxable property wealth.

Small/Sparse Adjustment

Districts are grouped into four small/sparse subcategories, or quartiles, with approximately equal numbers of districts in each. The category shows the amount of small/sparse adjustment as a percent of the total adjusted basic allotment amount. A fifth subcategory contains all districts receiving no small/sparse adjustment. This small/sparse percentage is a measure of the extent to which state funding is adjusted to compensate for small and/or sparsely populated districts.

Cost of Education Index

The Cost of Education Index (CEI) reflects geographic variations in costs beyond the control of school districts. The index currently in use was first implemented in 1991-92. The CEI has a minimum value of 0.0 and a maximum of 1.20. Most districts have a CEI value of at least 1.0.

Districts with a CEI value of 0.0 are primarily charters. This category divides districts into five groups with approximately equal numbers of districts in each.

Operating Cost Per Student

Operating costs are the sum of all expenditures budgeted for the operation of the district, for all funds which are reported. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per student amounts are the current school year expenditures divided by the current number of students. Districts are grouped into five subcategories with approximately equal numbers of districts in each. The source for budgeted expenditures is the fall submission of the Public Education Information Management System (PEIMS).

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center (ESC). The ESC region reflected in this category is the region from which the district receives services, not the geographically assigned ESC region. For the vast majority of districts, these are the same.

TAKS: Percent Passing all Tests Taken

For grades 3-11, the total number of students who passed all sections taken is expressed as a percentage of the total number of students taking one or more tests. Districts are grouped into five subcategories with the percent passing ranging from "under 53.9%" to "76.1% and over." Furthermore, these percentages include only those students enrolled in the district in October of the school year. A sixth subcategory refers to districts not administering the test.

SAT I/ACT: Percent Taking

Districts are grouped into three subcategories based on the percentage of non-special education graduates taking the SAT I or ACT, or both in the previous year. A fourth subcategory is for those districts that have no graduates.

SAT I/ACT: Percent Scoring At or Above Criterion

Districts are grouped into five subcategories based on the percentage of examinees who scored at or above the criterion score for either the ACT or SAT I in the previous year. The number of examinees meeting the criterion is divided by the number of examinees. A sixth subcategory is for those districts that have no test takers. The criterion score is 1110 for the SAT I Combined and 24 for the ACT Composite.

Student Density

Many years ago, the square miles in a school district were determined through a joint effort by the State Property Tax Board, now the CPTD, the Texas Education Agency, and the Texas Water Commission. School district maps provided by school districts to the CPTD were digitized by the Water Commission and acreage was determined. Density is the number of students per square mile. Density groups range from "fewer than five students per square mile" to "100 or more students per square mile." The six special statutory and 185 charter school districts form a separate group because mileage information is not available for them.

Pupil Change: 01/02 – 02/03

This category looks at the growth or decline in student population over a one-year period. Districts where the total number of students declined represent one grouping, while the remaining groups show one year growth rate ranging from "0%-3%" to "10% and over."

Percent African American, Hispanic, and Minority Students

In these categories, districts are grouped according to the ethnic composition of their student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of the three categories has six subgroups with the particular population ranging from "under 5%" to "50 percent and over."

Percent Economically Disadvantaged (Low Income) Students

Percent low income is the number of students reported as economically disadvantaged on PEIMS, expressed as a percent of the total number of students. Districts report students as economically disadvantaged if they meet any of the following conditions:

- a. eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- b. from a family with an annual income at or below the federal poverty line;
- c. eligible for Temporary Assistance to Needy Families (TANF) or other public assistance;
- d. recipients of a Pell Grant or comparable state program of need-based financial assistance;
- e. eligible for programs assisted under Title II of the Job Training Partnership Act; or
- f. eligible for benefits under the Food Stamp Act of 1977.

Districts are grouped into six subgroups ranging from "under 20%" to "80% and over."

Average Teacher Experience

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. Weighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts, when summed for all teachers within a district and divided by the total teacher FTE count within that respective district, result in the average years of teacher experience.

Average Teacher Salary

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary amount is for regular duties only and does not include pay for any supplemental duties.

Percent Minority Teachers

In this category, districts are grouped according to the minority composition of their teacher populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white teacher FTEs expressed as a percent of total teacher FTEs. The category has six groupings with the minority population ranging from "under 5%" to "50% and over."

Percent of Teachers With Advanced Degrees

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a master's degree or doctorate divided by the FTE count for all teachers.

Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. acceptance policies on student transfers from other school districts;
2. operation of school bus routes or runs on a nonsegregated basis;
3. nondiscrimination in extracurricular activities and the use of school facilities;
4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. nondiscriminatory practices relating to the use of a student's first language; and
7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
