## **Science Generalist EC–6 Standards**

## Final

## SCIENCE GENERALIST EC-6 STANDARDS

- **Standard I.** The science teacher manages classroom, field, and laboratory activities to ensure the safety of all students and the ethical care and treatment of organisms and specimens.
- *Standard II.* The science teacher understands the correct use of tools, materials, equipment, and technologies.
- **Standard III.** The science teacher understands the process of scientific inquiry and its role in science instruction.
- **Standard IV.** The science teacher has theoretical and practical knowledge about teaching science and about how students learn science.
- **Standard V.** The science teacher knows the varied and appropriate assessments and assessment practices to monitor science learning.
- Standard VI. The science teacher understands the history and nature of science.
- **Standard VII.** The science teacher understands how science affects the daily lives of students and how science interacts with and influences personal and societal decisions.
- **Standard VIII.** The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in physical science.
- **Standard IX.** The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in life science.
- **Standard X.** The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in Earth and space science.
- **Standard XI.** The science teacher knows unifying concepts and processes that are common to all sciences.

Standard I. The science teacher manages classroom, field, and laboratory activities to ensure the safety of all students and the ethical care and treatment of organisms and specimens.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do	
Teach	Teachers of Students in Grades EC–6		ers of Students in Grades EC–6
The beginning teacher knows and understands:		The be	ginning teacher is able to:
1.1k 1.2k	safety regulations and guidelines for science facilities; safety regulations and guidelines for science instruction;	1.1s	employ safe practices in designing, planning, and implementing all instructional activities (e.g., laboratory, field, demonstrations);
1.3k	procedures for the appropriate storage, handling, use, disposal, care, and maintenance of chemicals, materials, specimens, and equipment;	1.2s 1.3s	determine sufficient space and classroom arrangement for carrying out laboratory activities; provide students with continuous instruction and training in safe
1.4k 1.5k 1.6k	sources of information about laboratory safety; procedures for the safe handling and ethical care and treatment of organisms and specimens; procedures for responding to an accident in the laboratory, including	1.4s	techniques and procedures for all laboratory and field activities, student demonstrations, and independent projects; read and interpret safety information about chemicals on a Materials Safety Data Sheet (MSDS) and on other chemical labels, including household products;
1.7k	first aid; legal issues associated with accidents and injuries that occur in the classroom, field, or laboratory;	1.5s	check equipment for safety (e.g., cracks in glassware, proper grounding of electrical equipment) prior to use;
1.8k	potential safety hazards in the field (e.g., insect bites, poisonous plants); and	1.6s	create, implement, and enforce rules and safety procedures to promote and maintain a safe learning environment during laboratory and field activities;
1.9k	the importance of providing laboratory space and equipment for all students, including those with special needs.	1.7s	implement regular procedures to inventory and maintain appropriate safety equipment; and
		1.8s	optimize quick and safe access to all safety equipment (e.g., eyewash station, sink, safety shower, fire blanket, and extinguisher).

Standard II. The science teacher understands the correct use of tools, materials, equipment, and technologies.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do		
Teach	Teachers of Students in Grades EC–6		ers of Students in Grades EC–6	
The be	The beginning teacher knows and understands:		ginning teacher is able to:	
2.1k	procedures for the storing, securing, and routine maintenance of scientific equipment used in instructional activities;	2.1s	select and use appropriate tools, technology, materials, and equipment needed for instructional activities;	
2.2k	correct and safe operating procedures for scientific equipment used in instructional activities;	2.2s	instruct and monitor students' use of materials, tools, and instruments;	
2.3k	concepts of precision, accuracy, and error with regard to reading and	2.3s	make science resources accessible to all students;	
2.3K	recording numerical data from a scientific instrument;	2.4s	recycle, reuse, and conserve laboratory resources as appropriate;	
2.4k	the international system of measurement (i.e., metric system);	2.5s	use the appropriate number of significant figures to record and report numerical data;	
2.5k	the use of grade-appropriate equipment and technology for gathering, analyzing, and reporting data; and	2.6s	perform unit conversions within the international system of measurement (i.e., metric system);	
2.6k	the use of technology to acquire, assess, analyze, interpret, and communicate information.	2.7s	perform conversions within and across measurement systems;	
		2.8s	use techniques to calibrate measuring devices as appropriate;	
		2.9s	organize, display, and communicate data in a variety of ways (e.g., charts, tables, graphs, diagrams, written reports, oral presentations);	
		2.10s	gather, organize, display, and communicate data using appropriate technology (e.g., Internet, graphing calculators, spreadsheets); and	
		2.11s	evaluate the validity of data and data sources.	

Standard III. The science teacher understands the process of scientific inquiry and its role in science instruction.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do		
Teachers of Students in Grades EC–6		Teachers of Students in Grades EC–6		
The beginning teacher knows and understands:		The beginning teacher is able to:		
3.1k	how scientists use different types of investigation, depending on the questions they are trying to answer;	3.1s design and conduct inquiry-based scientific investigations, including nonexperimental and experimental designs;		
3.2k 3.3k 3.4k 3.5k	<ul> <li>principles and procedures for designing and conducting an inquiry-based scientific investigation (such as making observations; asking questions; researching and reviewing current knowledge in light of experimental evidence; using tools to gather and analyze evidence; proposing answers, explanations, and predictions; and communicating results);</li> <li>the characteristics of various types of scientific investigations (e.g., descriptive studies, controlled experiments, comparative data analysis);</li> <li>how current knowledge and theories guide scientific investigations;</li> <li>the use of technology in scientific research; and</li> </ul>	<ul> <li>3.2s plan and implement instruction that provides opportunities for all students to engage in scientific inquiry by using various appropriate combinations of the following processes:</li> <li>ask a scientific question;</li> <li>formulate a testable hypothesis;</li> <li>select appropriate equipment and technology for gathering information related to the hypothesis;</li> <li>make observations and collect data taking accurate and precise measurements;</li> <li>organize, analyze, and evaluate data to find data trends and patterns and make inferences; and</li> <li>communicate and defend a valid conclusion about the hypothesis under investigation;</li> </ul>		
3.6k	appropriate methods of statistical analysis and measures (e.g., mean, median, mode, correlation).	<ul> <li>3.3s link inquiry investigations to students' prior knowledge and experience;</li> <li>3.4s focus inquiry-based instruction on questions and issues that are relevant to students;</li> <li>3.5s use strategies to assist students in identifying, refining, and focusing scientific ideas and questions guiding an inquiry activity (i.e., an inquiry-based scientific investigation);</li> <li>3.6s guide students in making systematic observations and measurements;</li> <li>3.7s use a variety of tools and techniques to access, gather, store, retrieve, organize, and analyze data;</li> </ul>		

Standard III. The science teacher understands the process of scientific inquiry and its role in science instruction.

Application: What Teachers Can Do	
Teachers of Students in Grades EC–6 (continued)	
The beginning teacher is able to:	
3.8s provide opportunities for students to use higher-order thinking skills, logical reasoning, and scientific problem solving to reach conclusions based on evidence;	
3.9s develop, analyze, and evaluate different explanations for a given scientific result;	
3.10s identify potential sources of error in a given inquiry-based investigation; and	
3.11s develop criteria for assessing student participation in and understanding of the inquiry process.	

Standard IV. The science teacher has theoretical and practical knowledge about teaching science and about how students learn science.

Teach	er Knowledge: What Teachers Know	Applic	cation: What Teachers Can Do

The be	eginning teacher knows and understands:	The be	eginning teacher is able to:		
4.1k 4.2k 4.3k 4.4k 4.5k 4.6k	<ul> <li>theories about how students develop scientific understanding;</li> <li>how the developmental characteristics of students influence science learning;</li> <li>the statewide curriculum as defined in the Texas Essential Knowledge and Skills (TEKS);</li> <li>methods of planning and implementing an inquiry-based science program;</li> <li>how students' prior knowledge and attitudes about science may affect their learning;</li> </ul>	<ul> <li>4.1s</li> <li>4.2s</li> <li>4.3s</li> <li>4.4s</li> <li>4.5s</li> </ul>	<ul> <li>use lab and field investigations to enable students to develop an understanding of science;</li> <li>sequence learning activities in a way that allows students to build upon their prior knowledge and challenges them to expand their understanding of science;</li> <li>model active learning and inquiry processes for students;</li> <li>encourage students' self-motivation in their own learning;</li> <li>display and model scientific attributes, such as curiosity, openness to new ideas, and skepticism;</li> </ul>		
4.7k 4.8k 4.9k	<ul> <li>common student misconceptions in science and effective ways to address these misconceptions;</li> <li>how to establish a collaborative scientific community among students that supports actively engaged learning;</li> <li>the importance of planning activities that are inclusive and accommodate the needs of all students;</li> <li>strategies that students with diverse strengths and needs can use to determine word meaning in content-related texts;</li> </ul>	4.6s 4.7s 4.8s	<ul> <li>design and adapt curricula and select content to meet the interests, knowledge, understanding, abilities, experiences, and needs of students;</li> <li>use a variety of instructional strategies to ensure all students' reading comprehension of content-related texts, including helping students link the content of texts to their lives and connect related ideas across different texts;</li> <li>teach students how to locate, retrieve, and retain content-related information from a range of texts and technologies;</li> </ul>		
4.10k	strategies that students with diverse strengths and needs can use to develop content-area vocabulary;	4.9s	teach students how to locate the meanings and pronunciations of unfamiliar content-related words using appropriate sources, such as dictionaries, thesauruses, and glossaries;		

Standard IV. The science teacher has theoretical and practical knowledge about teaching science and about how students learn science.

	er Knowledge: What Teacher Know	Application: What Teachers Can Do	
reache	ers of Students in Grades EC–6 (continued)	Teachers of Students in Grades EC–6 (continued)	
The be	ginning teacher knows and understands:	The beginning teacher is able to:	
4.11k	strategies that students with diverse strengths and needs can use to facilitate comprehension before, during, and after reading content-related texts;	4.10s use questioning strategies to move students from concrete to more abstract understanding;	;
4.12k	the design and management of learning environments that provide the time, space, and resources needed for learning science;	4.11s respect student diversity and encourage all students to participate in science learning;	fully
4.13k	the importance of ongoing assessment of student learning and one's own teaching practice in the science classroom; and	4.12s manage time to provide adequate opportunity for all students to participate in investigations;	
		4.13s create an environment to focus and support student inquiries;	
4.14k	the teacher's role in the ongoing evaluation and development of science in the total school program.	4.14s use individual, small-group, and whole-class strategies to support student learning;	
		4.15s foster collaboration among students; and	
		4.16s implement science activities to incorporate school wide objectives.	

## Science Generalist EC–6 Standards

Standard V. The science teacher knows the varied and appropriate assessments and assessment practices to monitor science learning.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do	
Teachers of Students in Grades EC–6		Teachers of Students in Grades EC–6	
The beginning teacher knows and understands:		The be	eginning teacher is able to:
5.1k	the relationships among curriculum, assessment, and instruction;	5.1s	use formal and informal assessments of science performance and products (e.g., rubrics, portfolios, student profiles, checklists) to
5.2k	characteristics of various assessments, such as reliability, validity, and the absence of bias;		evaluate student participation in and understanding of the inquiry process (i.e., of inquiry-based scientific investigations);
5.3k	the purposes, characteristics, and uses of various types of assessments in science, including formative and summative assessments;	5.2s	select or design a variety of appropriate assessment instruments and/or methods (e.g., formal/informal, formative/summative) to monitor student understanding and progress;
5.4k	the importance of carefully selecting or designing formative and	5.3s	design assessments that match each learning objective;
	summative assessments for the specific decisions they are intended to inform;	5.4s	base decisions regarding instructional content, methods, and practice on information about students' strengths and needs gathered through
5.5k	the importance of monitoring and assessing students' science	ice assessmen	assessment;
	understanding and skills on a regular, ongoing basis;	5.5s	select assessment instruments and methods that provide students with adequate opportunities to demonstrate their achievements;
5.6k	ways in which assessment results inform instructional practice;		
5.7k	strategies for assessing students' prior knowledge and misconceptions about science;	5.6s	evaluate assessment materials and procedures for reliability, validity, absence of bias, and clarity of language;
		5.7s	encourage use of self-assessment strategies in science;
5.8k	questioning strategies designed to elicit higher-level thinking;	5.8s	use a variety of strategies (e.g., pre-testing, reviewing student
5.9k	the importance of sharing evaluation criteria with students;		journals, monitoring discussions, asking questions) to gain insight about students' prior knowledge and misconceptions about science;
5.10k	the role of assessments as learning experiences; and	5.9s	state evaluation criteria clearly so that students can understand and
5.11k	strategies for engaging students in meaningful self-assessment.		derive meaning from them; and
		5.10s	evaluate the quality of data obtained from an assessment and determine what decisions can appropriately be made based on the data.

Standard VI. The science teacher understands the history and nature of science.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do		
Teachers of Students in Grades EC–6		Teachers of Students in Grades EC–6		
The be	ginning teacher knows and understands:	The beginning teacher is able to:		
<ul> <li>6.1k</li> <li>6.2k</li> <li>6.3k</li> <li>6.4k</li> <li>6.5k</li> <li>6.6k</li> <li>6.7k</li> <li>6.8k</li> </ul>	<ul> <li>the limitations of the scope of science and the use and limitations of physical, mathematical, and conceptual models to describe and analyze scientific ideas about the natural world;</li> <li>that science is a human endeavor influenced by societal, cultural, and personal views of the world;</li> <li>that scientific ideas and explanations must be consistent with observational and experimental evidence;</li> <li>how logical reasoning is used in the process of developing, evaluating, and validating scientific hypotheses and theories;</li> <li>the roles that publishing and peer review play in developing and validating scientific knowledge;</li> <li>principles of scientific ethics in reporting data and in experimenting with living organisms, including human subjects;</li> <li>that scientific theories have predictive power;</li> <li>that scientific theories are constantly being modified to conform more closely to new observational and experimental evidence about the</li> </ul>	<ul> <li>provide students with opport that science can and cannot design and conduct scient</li> <li>analyze, review, and critique scientific explanations, hypevidence and information;</li> <li>analyze ways in which perdirection, support, and use</li> <li>use key events and knowle history of science to illustrate design instruction that accoundividuals from a variety of use examples from the histories</li> </ul>	ific investigations to answer questions; ue the strengths and weaknesses of potheses, and theories using scientific sonal or societal bias can affect the of scientific research; edge of individuals from throughout the ate scientific concepts; ounts for the contributions to science of	
6.9k	natural world; the historical development of science and the contributions that diverse cultures and individuals of both genders have made to scientific knowledge; and			
6.10k	the relationship between science and technology.			

Standard VII. The science teacher understands how science affects the daily lives of students and how science interacts with and influences personal and societal decisions.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do			
Teach	Teachers of Students in Grades EC–6		Teachers of Students in Grades EC–6		
The beginning teacher knows and understands:		The be	eginning teacher is able to:		
7.1k	that human decisions about the use of science and technology are based on factors such as ethical standards, economics, and societal and personal needs;	7.1s	use situations from students' daily lives to develop instructional materials that investigate how science can be used to make informed decisions;		
7.2k	scientific concepts and principles relating to personal and societal health, including the physiological and psychological effects and risks associated with the use of substances and substance abuse;	7.2s	apply scientific principles and processes to analyze factors (e.g., diet, exercise, personal behavior) that influence personal choices concerning fitness and health;		
7.3k	concepts related to changes in populations and to characteristics of human population growth;	7.3s	analyze factors that affect the severity of disease and methods for preventing, controlling, or curing diseases and ailments;		
7.4k	types and uses of natural resources and the effects of human consumption on the renewal and depletion of resources;	7.4s	analyze how factors such as population growth, resource use, population distribution, overconsumption, technological capacity, poverty, and societal views can influence changes in environments;		
7.5k	the properties of natural ecosystems and how natural and human processes can influence changes in environments;	7.5s	apply scientific principles and the theory of probability to analyze the advantages, disadvantages, or alternatives to a given decision or		
7.6k	the principles of risk and benefit analysis and how it is used in the process of personal and societal decision making; and		course of action; and		
7.7k	the role science can play in helping resolve personal, societal, and global challenges.	7.6s	demonstrate how science can be used to help make informed decisions about societal and global issues.		

Standard VIII. The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in physical science.

Teacher Knowledge: What Teachers Know	Application: What Teachers Can Do
Teachers of Students in Grades EC–6	Teachers of Students in Grades EC–6
Physical Science	Physical Science
The beginning teacher knows and understands:	The beginning teacher is able to:
<ul><li>8.1k properties of objects and materials;</li><li>8.2k concepts of force and motion;</li></ul>	8.1s select appropriate techniques, procedures, and tools to observe and record properties of materials (e.g., size, shape, temperature, magnetism, hardness, mass, conduction, density);
<ul> <li>8.3k concepts of heat, light, electricity, and magnetism;</li> <li>8.4k conservation of energy and energy transformations;</li> <li>8.5k the relationship between force and motion;</li> <li>8.6k physical and chemical properties and changes in matter</li> <li>8.7k energy and energy transformations; and</li> <li>8.8k the conservation of matter and energy.</li> </ul>	<ul> <li>8.2s analyze changes in the position and motion of an object subject to an unbalanced force;</li> <li>8.3s apply properties of fundamental forces (e.g., push or pull, friction, gravity, electric force, magnetic force) to analyze common objects (e.g., toys, playground equipment), experiences, and situations;</li> <li>8.4s describe and analyze changes in the states of matter caused by the addition or removal of heat energy;</li> <li>8.5s describe the properties of various forms of energy (e.g., mechanical, sound, heat, light) and analyze how energy is transformed from one form to another in a variety of everyday situations;</li> </ul>
	<ul> <li>8.6s measure, graph, and describe changes in motion and analyze the relationship between force and motion in a variety of situations including simple machines, the flow of blood through the human bod and geologic processes;</li> <li>8.7s investigate physical properties of solids, liquids, and gases;</li> <li>8.8s analyze physical and chemical changes in matter;</li> </ul>

Standard VIII. The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in physical science.

Application: What Teachers Can Do	
Teachers of Students in Grades EC– 6 (continued)	
Physical Science	
The beginning teacher is able to:	
8.9s apply properties and characteristics of waves to analyze sound, light, and other wave phenomena;	
8.10s interpret the periodic table and chemical formulas and equations;	
8.11s apply the law of conservation of energy to analyze a variety of phenomena (e.g., specific heat, chemical and nuclear reactions, efficiency of simple machines);	
8.12s apply the law of conservation of matter to analyze a variety of phenomena (e.g., water cycle, decomposition); and	
8.13s analyze the transfer of energy in a variety of situations (e.g., the production of heat, light, sound, and magnetic effects by electrical energy; the process of photosynthesis; weather processes).	

Standard IX. The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in life science.

Teacher Knowledge: What Teachers Know		Application: What Teachers Can Do		
Teach	Teachers of Students in Grades EC–6		Teachers of Students in Grades EC–6	
Life So	Life Science		cience	
The beginning teacher knows and understands:		The be	eginning teacher is able to:	
9.1k	that living systems have different structures to perform different functions;	9.1s	describe stages in the life cycle of common plants and animals;	
9.2k	that organisms have basic needs;	9.2s	identify characteristics (e.g., physical traits) of plants and animals;	
9.3k	that organisms respond to internal or external stimuli;	9.3s	identify adaptive characteristics and explain how adaptations influence the survival of populations or species;	
9.4k	the relationship between organisms and the environment;	9.4s	describe the processes by which plants and animals reproduce and	
9.5k	the life cycles of organisms;		explain how hereditary information is passed from one generation to the next;	
9.6k	how populations or species change over time;	9.5s	analyze the role of internal and external stimuli in the behavior of organisms;	
9.7k	the structure and function of living systems;	9.6s	compare and contrast inherited traits and learned characteristics;	
9.8k	reproduction and the mechanisms of heredity;	9.7s	describe ways living organisms depend on each other and their	
9.9k	adaptations of organisms and the theory of evolution;	9.75	environment for basic needs;	
9.10k	regulatory mechanisms and behavior; and	9.8s	analyze the characteristics of habitats within an ecosystem;	
9.11k	the relationships between organisms and the environment.	9.9s	identify organisms, populations, or species with similar needs and analyze how they compete with one another for resources;	
		9.10s	analyze how structure complements function in cells, organs, organ systems, organisms, and populations;	
		9.11s	identify human body systems and describe their functions;	

Standard IX. The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in life science.

<ul> <li>its traits;</li> <li>9.14s describe how an inherited trait can be determined by one or by many genes and how more than one trait can be influenced by a single gene;</li> <li>9.15s compare and contrast sexual and asexual reproduction;</li> <li>9.16s compare traits in a population or species that enhance its survival and reproduction;</li> <li>9.17s describe how populations and species change through time;</li> <li>9.18s analyze responses in organisms that result from internal and external stimuli;</li> <li>9.19s describe feedback mechanisms that allow organisms to maintain stable internal conditions;</li> <li>9.20s identify the abiotic and biotic components of an ecosystem;</li> <li>9.21s describe the interrelationships among producers, consumers, and decomposers in an ecosystem; and</li> </ul>	Applic	ation: What Teachers Can Do

9.21s describe the interrelationships among producers, consumers, and decomposers in an ecosystem; and	9.19s					
decomposers in an ecosystem; and	9.20s	identify the abiotic and biotic components of an ecosystem;				
	9.21s					
9.22s analyze and describe adaptive characteristics that result in a population's or species' unique niche in an ecosystem	9.22s	analyze and describe adaptive characteristics that result in a population's or species' unique niche in an ecosystem				

Standard X. The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in Earth and space science.

Teacher Knowledge: What Teachers Know	Application: What Teachers Can Do		
Teachers of Students in Grades EC–6	Teachers of Students in Grades EC–6		
Earth and Space Science	Earth and Space Science		
The beginning teacher knows and understands:	The beginning teacher is able to:		
<ul> <li>10.1k properties of Earth materials;</li> <li>10.2k changes in Earth systems;</li> <li>10.3k characteristics of the sun, moon, and stars;</li> <li>10.4k the start and start for the sun for a start for the start start for the start start for the start star</li></ul>	<ul> <li>10.1s describe properties and uses of rocks, soils, water, atmospheric gases, and other Earth materials;</li> <li>10.2s describe characteristics of weather, tools for making weather measurements, and changes in weather;</li> </ul>		
<ul> <li>10.4k the structure and function of Earth systems;</li> <li>10.5k cycles in Earth systems;</li> <li>10.6k the role of energy in weather and climate;</li> <li>10.7k characteristics of the solar system; and</li> </ul>	<ul> <li>10.3s describe forces and processes that change the surface of Earth (e.g., glaciers, earthquakes, weathering);</li> <li>10.4s identify objects in the sky and describe their characteristics (e.g., sun as Earth's major energy source, position of the planets in relation to the sun); and</li> </ul>		
10.8k the history of Earth.	<ul> <li>10.5s describe the basic characteristics of the sun and other stars; analyze the consequence of the moon's orbit around Earth (e.g., phases of the moon) and Earth's orientation and movement around the sun (e.g., day and night, the seasons).</li> </ul>		
	10.6s analyze and describe characteristics of the geosphere, the hydrosphere, the atmosphere, and the biosphere;		
	10.7s analyze a variety of Earth cycles (e.g., rock cycle, water cycle, carbon cycle, nitrogen cycle);		
	10.8s analyze and describe how human activity and natural processes, both gradual and catastrophic, can alter Earth systems;		

Standard X. The science teacher knows and understands the science content appropriate to teach the statewide curriculum (Texas Essential Knowledge and Skills [TEKS]) in Earth and space science.

Application: What Teachers Can Do Teachers of Students in Grades EC–6 (continued)	
Earth and Space Science	
The beginning teacher is able to:	
10.9s identify properties of and analyze interactions among the components of the solar system;	
10.10s explain weather measurements and analyze weather processes; and	
10.11s analyze how the Earth's position, orientation, and surface features affect weather and climate.	

Standard XI. The science teacher knows unifying concepts and processes that are common to all sciences.

Teacher Knowledge: What Teachers Know			Application: What Teachers Can Do		
Teachers of Students in Grades EC–6			Teachers of Students in Grades EC–6		
The beginning teacher knows and understands:		The beginning teacher is able to:			
11.1k 11.2k	how systems and subsystems can be used as a conceptual framework to organize and unify the common themes of science and technology; how patterns in observations and data which explain natural	11.1s	apply the systems model (e.g., interacting parts, boundaries, input, output, feedback, subsystems) to identify and analyze common themes that occur in physical science, life science, and Earth and space science;		
	phenomena allow predictions to be made;	11.00			
11.3k	how the concepts and processes listed below provide a unifying framework across the science disciplines:	11.2s	analyze a system (e.g., a cell, the ocean, an ideal gas) in terms of cycles, structure, and processes;		
	<ul> <li>systems, order, and organization;</li> <li>evidence, models, and explanation;</li> </ul>	11.3s	analyze the general features of systems (e.g., input, process, output, feedback);		
	<ul> <li>change, constancy, and measurements;</li> <li>evolution and equilibrium; and</li> <li>form and function;</li> </ul>	11.4s	analyze the interactions that occur between the components of a given system or subsystem;		
11.4k	properties and patterns of systems can be described in terms of	11.5s	analyze the interactions and interrelationships between various systems and subsystems; and		
	space, time, energy, and matter;	11.6s	use the systems model to analyze the concepts of constancy		
11.5k	how change and constancy occur in systems (e.g., conservation laws, symmetry, stability, cyclic variation, rates of change);		(e.g., conservation of mass, energy, and momentum) and change (e.g., evolution).		
11.6k	the complementary nature of form and function in a given system; and				
11.7k	how models are used to represent the natural world and how to evaluate the strengths and limitations of a variety of scientific models (e.g., physical, conceptual, mathematical).
