

Engage students and advance digital learning with Schoology.

In response to COVID-related school closures, TEA is providing Schoology as an optional LMS for all Texas public districts and charter schools at no cost.

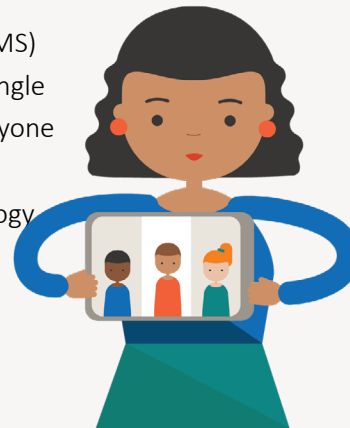

Schoology complements and integrates with Texas Home Learning to support in-person, online, and blended learning models. Texas Home Learning is a suite of TEKS-aligned content from leading education technology providers.

Schoology also includes many features to support personalized learning, promote student engagement, and enable parent involvement.

Discover the Benefits of an LMS

A learning management system (LMS) is a digital space that serves as a single teaching and learning hub for everyone in the district. It brings together information from multiple technology platforms in one place so parents, students, and teachers can share resources, answer questions, and stay connected.

Schoology Features and Benefits

- **A secure online environment** where students and families can access assignments, instructional support, class calendars, and other resources
- **Grading, feedback, and progress monitoring** tools to share feedback in real time
- **Live collaboration tools** for an entire class or small groups
- **Attendance tracking capabilities** for synchronous or asynchronous learning*
- **Integration** with most student information systems
- **Virtual training for districts**
