Abstract. This annual report provides information for the 2014-15 school year on grade-level retention in the Texas public school system. Data on retention are provided by student characteristics, including grade level; race/ethnicity; gender; degree of English proficiency; and economic, at-risk, immigrant, migrant, and overage statuses. Data also are provided by program participation in special education, career and technical education, gifted and talented, and Title I.

Keywords. Retention, retention rate, special education, English proficiency, English language learner, economically disadvantaged.

Additional copies of this document may be purchased using the order form in the back of this publication. Also, the report is available in PDF format on the agency website at <u>http://tea.texas.gov/acctres/retention_index.html</u>. Additional information about this report may be obtained by contacting the Texas Education Agency Division of Research and Analysis by phone at (512) 475-3523 or by e-mail at Research@tea.texas.gov.

Introduction

Overview

Highlights

Overview

This report provides retention rates for students attending Texas public schools in 2014-15. The retention rate measures the percentage of students enrolled in the fall of a given school year who were enrolled in the same grade in the previous school year. Because grade-level retention differs between elementary and secondary grades, retention rates at the elementary and secondary levels are presented separately in this report. Rates are provided by student characteristics, including grade level; race/ethnicity; gender; and economic, at-risk, English language learner, immigrant, migrant, and overage statuses. Data also are provided by participation in special education, career and technical education, gifted and talented, and Title I programs. In addition to statewide rates, the report provides historical information about retention and promotion policies in Texas public schools. A companion report, *Grade-Level Retention and Student Performance in Texas Public Schools, 2014-15* (Texas Education Agency, forthcoming), presents data on the performance of retained students on the State of Texas Assessments of Academic Readiness. Grade-level retention data by campus, district, and education service center region are available on the Texas Education Agency website at <u>http://tea.texas.gov/acctres/retention/years.html</u>.

Highlights

- In 2014-15, the retention rate for Texas public school students in Grades K-12 was 3.0 percent, a decrease of 0.1 percentage points from the previous year.
- In 2014-15, the retention rate for students in elementary grades was 2.0 percent, and the rate for students in secondary grades was 4.1 percent. Both rates decreased by 0.2 percentage points from the previous school year.
- Across Grades K-6 in 2014-15, retention rates were highest in Grade 1, at 4.3 percent, and lowest in Grade 6, at 0.6 percent. Across Grades 7-12, retention rates were highest in Grade 9, at 8.6 percent, and lowest in Grades 7 and 8, at 0.8 percent each.
- Across the five largest racial/ethnic groups in 2014-15, the retention rate for Grades K-12 was highest among African American students (3.8%), followed by Hispanic (3.5%), multiracial (2.2%), White (1.9%), and Asian (1.0%) students.

History of Promotion Policies in Texas

History of Promotion Policies in Texas

While consistently requiring that decisions about student promotion be based on academic achievement, Texas policy on promotion and retention has evolved over the past three decades. Legislation passed in 1984 prohibited social promotion, requiring instead that students be promoted only on the basis of academic achievement (Texas Education Code [TEC] §21.721, *Grade Requirement for Advancement or Course Credit*, 1986). The State Board of Education (SBOE) rules implementing the legislation, *Promotions and Alternatives to Social Promotion* (Title 19 of the Texas Administrative Code [TAC] §§75.191-75.195, 1985), outlined the grading procedures to be used by districts and guidelines for promotion. The rules included the provisions that no student could repeat the same grade more than once or repeat more than two grade levels during the elementary grades.

In 1987, legislation was enacted to expand TEC §21.557, *Compensatory and Remedial Instruction* (1988). The legislation provided a definition of students in Grades 7-12 considered to be at risk of dropping out of school and required districts to provide remedial and support programs for these students. The definition of "at-risk" students included students who had not advanced from one grade level to the next in two or more school years.

In 1991, the rule prohibiting retention of students below Grade 1 was amended to allow districts to assign six-year-old students who were not developmentally ready for the first grade to grades deemed appropriate by the schools (19 TAC §75.195(j), 1992 Supplement).

Also in 1991, legislation updated TEC §21.721 (1992) to eliminate the prohibition on advancement of students with grade averages below 70. Policies on advancement from one grade level to the next were to be adopted by school districts. Local policies on promotion had to incorporate a variety of factors, including a minimum, yearly grade point average of 70; course grades earned in each subject; performance on the Texas Assessment of Academic Skills (TAAS); extenuating circumstances; and the judgments of parents and teachers. Districts were required to consider alternatives to retention, including extended school day, extended school year, specialized tutorial support, peer tutoring, cross-age tutoring, student mentoring, and summer programs.

A retention reduction grant program was enacted in 1993 (TEC §21.562, 1994). A \$5 million appropriation allowed 54 Texas school districts to pilot extended instructional programs to eliminate retentions in first grade during the 1992-93 school year. The retention reduction grants allowed school districts and campuses to offer programs based on lengthening the school year as alternatives to retention. These programs provided additional instruction to students who needed extra assistance to master the first-grade objectives in the Essential Elements—the state-mandated curriculum in place at that time. The pilots were extended to the second grade in 1994-95.

School districts not receiving retention reduction grants could apply to the commissioner of education for approval to provide extended year programs (TEC §21.563, *Optional Extended Year Program*, 1994). Optional extended year programs (OEYPs) of up to 45 days in length could be

provided to students in Grades K-8 who would otherwise be retained. To fund the programs, school districts could reduce the number of instructional days during the regular school year by five.

In 1995, the Texas Education Code was reviewed and readopted. In the new code, the provisions on promotion, *Student Advancement*, reiterated that students be promoted only on the basis of academic achievement or demonstrated proficiency in the subject matter of the course or grade level (TEC §28.021, 1996). At the same time, the language regulating local promotion and retention policies was repealed. In April 1996, the SBOE rules regulating local policies, including restrictions on the number of times students could be retained in grade, were also repealed. The definition of students at risk of dropping out was carried forward (TEC §29.081, 1996).

The 1995 TEC revisions included a single set of provisions for extended year programs (TEC §29.082, 1996). Commissioner of education rules implementing the OEYP were adopted to be effective in May 1996 (19 TAC §105.1001, 1997). Districts were required to promote each student who attended at least 90 percent of the extended year program days, unless the student's parents requested that the student be retained. If the parents requested retention, the student's principal, teacher, and counselor were required to meet with the parents to provide information on the effects of retention on future academic performance, student self-esteem, and high school completion. The commissioner of education was directed to withhold 5 percent of the Foundation School Program compensatory education allotment to finance extended year programs. This increased to about \$50 million per year the allocation for extended year programs for students in Grades K-8 who were identified as not likely to be promoted. Districts could use portions of their compensatory education allotments or apply for state funds to implement extended year programs. Although districts had to apply for state OEYP funds, they were no longer required to apply for approval to operate OEYPs funded locally.

The promotion policies implemented in Texas public schools in 2002-03 built on the state curriculum and assessment programs that had been developed over many years. In 1984, Texas first adopted a state curriculum, known as the Essential Elements (19 TAC Chapter 75, Subchapters B-D, 1984). Over the years, the rigor of knowledge and skills required of students increased. A revised curriculum, the Texas Essential Knowledge and Skills (TEKS), was adopted by the SBOE and became effective on September 1, 1998 (19 TAC Chapters 110-128, 1998). By state law and SBOE rule, the TEKS in the foundation areas of English language arts and reading, mathematics, science, and social studies are required for use in instruction and statewide assessment. The TEKS have been widely distributed to schools and to the public. Professional development on TEKS implementation in the classroom has been available statewide.

The state testing program known as TAAS was introduced in 1990. When last administered in 2002, the TAAS measured mastery of the state curriculum in reading and mathematics at Grades 3-8 and 10; in writing at Grades 4, 8, and 10; and in science and social studies at Grade 8. The Grade 10 tests served as an exit-level examination. As was the case under the previous testing program, the Texas Educational Assessment of Minimum Skills (TEAMS), satisfactory performance on the exit-level examination was a prerequisite to a high school diploma.

In 2002-03, a new, more rigorous state assessment system, the Texas Assessment of Knowledge and Skills (TAKS), was introduced. Like the TAAS, the TAKS was aligned with the state curriculum, measuring the extent to which a student learned and was able to apply the knowledge and skills defined in the TEKS at each grade level tested.

In response to statutory requirements, the TAKS was replaced by the more rigorous State of Texas Assessments of Academic Readiness (STAAR) beginning in 2011-12 (TEC Chapter 39, 2010). STAAR is aligned with the TEKS and provides the foundation for the accountability system for Texas public education. In Grades 3-8, STAAR assesses the same grade-specific subjects that were assessed with the TAKS. In high school, however, grade-specific assessments have been replaced by end-of-course (EOC) assessments. Although 15 EOCs were originally required to graduate for students who started Grade 9 in 2011-12, the 83rd Texas Legislature reduced the requirement to five assessments in 2013: Algebra I, Biology, English I, English II, and U.S. History. To comply with graduation standards already in place, high school students who began Grade 9 in 2010-11 or earlier continue to take grade-specific TAKS assessments.

State testing procedures allow accommodations on TAKS and STAAR for students who need them. Spanish-language versions of the tests are available to assess the progress of students in Grades 3-5 who are proficient in Spanish but not yet proficient in English. In some circumstances, students are exempted from the standard assessments. The admission, review, and dismissal (ARD) committees responsible for students receiving special education services can specify alternate assessment instruments.

Since 1995, Texas statute has stipulated that "a student may be promoted only on the basis of academic achievement or demonstrated proficiency of the subject matter of the course or grade level" (TEC §28.021, 1996). In 1999, specific provisions linking test performance, promotion, and instruction were added (TEC §28.0211, 1999). From 2002-03 to 2008-09, students in Grade 3 were required to pass the state reading test to advance to Grade 4. Students in Grade 5 were required to pass the state reading and mathematics tests beginning in 2004-05. Students in Grade 8 were required to pass the reading and mathematics tests beginning in 2007-08. Through the 2010-11 school year, students in Grades 5 and 8 were given three opportunities to pass the TAKS. School districts were required to provide accelerated instruction in the subject areas failed after each test administration (TEC §28.0211, 2010).

If a student failed the test a second time, the district was required to establish a grade placement committee (GPC) to determine the accelerated instruction the student would receive before the third testing opportunity. A student who failed to perform satisfactorily on the third opportunity was required to be retained. A parent or guardian could appeal the retention decision to the GPC. The GPC could decide in favor of advancement if committee members unanimously concluded, based on standards adopted by the local school board, that the student was likely to perform on grade level if given additional accelerated instruction during the next school year.

In 2009, the 81st Texas Legislature stipulated that students in Grade 5 or Grade 8 who fail the state reading or mathematics assessment must complete accelerated instruction before they may be

promoted to the next grade level (TEC §28.0211, 2010). Districts anticipated difficulty implementing the provision for students who fail the third administration of a Grade 5 or Grade 8 test, which occurs during the summer. To help districts and charter schools meet the requirement, the Texas Education Agency developed a waiver allowing promotion of such students to the next grade level prior to the completion of accelerated instruction. A district or charter school applying for the waiver in 2014-15 was required to: identify the intensive instruction each student needed; target the instruction to the STAAR objectives on which each student demonstrated weakness; ensure each student completed the instruction during the first six weeks of the school year; and document that each student completed the instruction. In addition, the GPC is responsible for developing a plan that will provide the student with ongoing instructional support during the next school year.

In 2014-15, the STAAR mathematics tests were updated to reflect the revised mathematics TEKS adopted by the State Board of Education in 2012. As a result of these changes, performance standards for 2015 STAAR mathematics tests in Grades 3-8 were not set until after the spring 2015 administration. In addition, Student Success Initiative (SSI) retest opportunities for STAAR mathematics tests in Grades 5 and 8 were not offered in May and June of 2015. Districts were instructed to use other relevant academic information in place of STAAR mathematics results when making promotion and retention decisions. This was similar to the approach used for SSI in spring 2012 for the first administration of the STAAR. SSI requirements for reading remained in effect in 2014-15.

Retention Reporting for 2014-15

Definitions and Calculations

State Summary

Grade-Level Retention by Grade

Grade-Level Retention by Race/Ethnicity

Grade-Level Retention by Economic Status

Grade-Level Retention by Gender

Grade-Level Retention by English Language Learner Status

Grade-Level Retention of Special Education Students by Primary Disability

Grade-Level Retention by At-Risk, Immigrant, Migrant, and Overage Student Characteristics

Grade-Level Retention by Career and Technical Education, Gifted and Talented, and Title I Program Participation

Definitions and Calculations

Retention Definition

Grade retention has been defined as requiring a child to repeat a particular grade or delaying entry to kindergarten or first grade. This definition of retention—repetition of a grade or delayed entry—applies primarily to Grades K-6. The same grade level in successive years in high school does not necessarily represent the repetition of a full year's curriculum, as it does in elementary school. Secondary school programs are structured around individual courses. Because passing and failing are determined at the level of the course and credits are awarded for courses completed successfully, the concept of a "grade level" becomes more fluid. Students who fail to earn credit in a single course or take fewer courses than required in one year may be classified at the same grade level in two consecutive years. Practices in Grades 7 and 8 may be like those in elementary school or like those in high school, depending on local school district policies.

Data used in this report on the grade levels of all students in the Texas public school system were drawn from the Public Education Information Management System (PEIMS) (Texas Education Agency [TEA], 2015). Data on student characteristics and program participation were also available in PEIMS.

Retention Rate Calculations

Retention rates for the 2014-15 school year were calculated by comparing 2014-15 attendance records to fall 2015 enrollment records. Students who left the Texas public school system for any reason other than graduation were excluded from the total student count. Students new to the Texas public school system in fall 2015 were also excluded. Students who enrolled both years or graduated were included in the total student count. Students found to have been enrolled in the same grade in both years were counted as retained. Students found to have been in a higher grade in fall 2015 than in 2014-15 were counted as promoted. Students reported to have had improbable grade sequences were assigned an "unknown" promotion status. Retention rates were calculated by dividing number of students retained by total student count. Because of the criteria used, student counts in this report differ from those in other agency publications.

Retention rates have been calculated by TEA based on year-to-year progress of individual students since 1994-95. Prior to the 1998-99 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1998-99, additional enrollment data for Grades 7-12 were collected by TEA to calculate the secondary school dropout and graduation rates. This collection expanded available Grades 7-12 enrollment data beyond students enrolled the last Friday in October to include students enrolled at any time during the fall. The change in the retention calculation allowed more secondary school students to be included and made the calculation of the retention rate more like that of the secondary school dropout and graduation rates. Expanded enrollment data were not collected for Grades K-6, so the method of calculating enrollment counts for Grades K-6 was unchanged.

Retention Rates by Race/Ethnicity

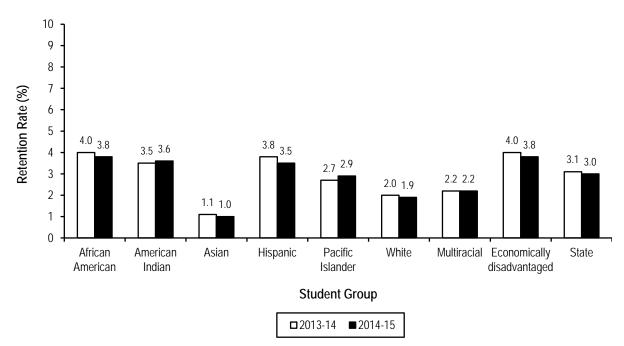

Because rates for smaller groups can be less stable over time, comparisons of rates across racial/ethnic groups can be misleading when one group is small compared to other groups. The non-Hispanic American Indian and Pacific Islander student populations are small in number, compared to other racial/ethnic populations. Similarly, within the overall Hispanic student population, the Asian and Pacific Islander populations are small in number, compared to other racial populations. Therefore, discussions of results in this report, including comparisons across racial/ethnic groups, do not include these populations.

State Summary

In the 2014-15 school year, 3.0 percent (144,945) of Texas public school students in Grades K-12 were retained (Table 1). The retention rate decreased by 0.1 percentage points from the previous school year. The rate for students in elementary grades was 2.0 percent, and the rate for students in secondary grades was 4.1 percent.

Across the five largest racial/ethnic groups in 2014-15, the retention rate was highest among African American students (3.8%), followed by Hispanic (3.5%), multiracial (2.2%), White (1.9%), and Asian (1.0%) students (Figure 1 and Table 1). The retention rate for students identified as economically disadvantaged was 3.8 percent. Male students had a higher retention rate (3.6%) than female students (2.3%) (Table 1).

Note. Racial groups (African American, American Indian, Asian, Pacific Islander, White, and multiracial) do not include students of Hispanic ethnicity.

Table 1 Grade-Level Retention, by Race/Ethnicity, Economic Status, Gender, and Grade Span, Texas Public Schools, 2013-14 and 2014-15

		2013-14	2014-15			
Group	All students	Retained	Rate (%)	All students	Retained	Rate (%)
African American	600,633	24,143	4.0	611,378	23,400	3.8
American Indian	18,220	646	3.5	18,790	668	3.6
Asian	181,644	2,034	1.1	191,561	1,904	1.0
Hispanic	2,468,437	92,814	3.8	2,532,336	88,826	3.5
Pacific Islander	6,179	167	2.7	6,486	188	2.9
White	1,431,604	29,210	2.0	1,433,060	27,831	1.9
Multiracial	89,869	1,959	2.2	95,566	2,128	2.2
Economically disadvantaged	2,904,391	117,258	4.0	2,907,119	110,047	3.8
Not economically disadvantaged	1,892,195	33,715	1.8	1,982,058	34,898	1.8
Female	2,337,643	58,465	2.5	2,384,165	55,970	2.3
Male	2,458,943	92,508	3.8	2,505,012	88,975	3.6
Grades K-6	2,679,569	59,294	2.2	2,721,733	55,339	2.0
Grades 7-12	2,117,017	91,679	4.3	2,167,444	89,606	4.1
State	4,796,586	150,973	3.1	4,889,177	144,945	3.0

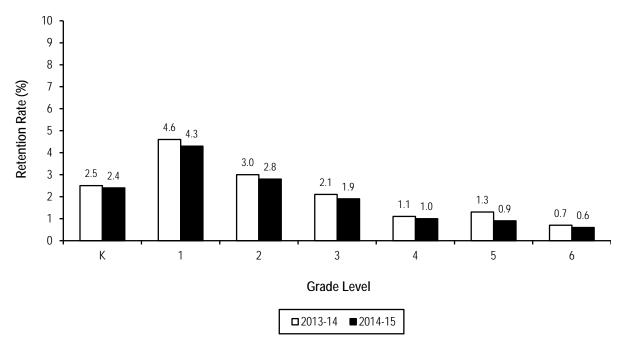

Note. Racial groups (African American, American Indian, Asian, Pacific Islander, White, and multiracial) do not include students of Hispanic ethnicity.

Grade-Level Retention by Grade

Elementary Grades

In 2014-15, the retention rate for Grades K-6 was 2.0 percent, a decrease of 0.2 percentage points from the previous year (Table 2). Across the elementary grades, retention rates were highest in Grades 1 and 2 (4.3% and 2.8%, respectively) and lowest in Grades 5 and 6 (0.9% and 0.6%, respectively) (Figure 2 and Table 2).

Year		К		1		2	3		
	Retained	Rate (%)							
2004-05	12,190	3.7	21,496	6.4	11,859	3.6	10,366	3.2	
2005-06	12,559	3.7	22,540	6.4	12,477	3.7	9,758	2.9

Grade-Level Retention by Grade

Secondary Grades

Retention in the secondary grades does not necessarily take the same form as retention in the elementary grades. Whereas a student retained in the elementary grades is likely to repeat a year's curriculum in its entirety, a student retained in the secondary grades may only need to repeat a single course. In Grades 9-12, a student can be classified at the same grade level for two years because one course out of six or seven was not completed successfully. In such a case, the student may be able to "catch up" with his or her peers by making up the required course. Policies on grade-level assignment at the secondary level vary by district. Retention practices in Grades 7 and 8 may be like those in elementary school or like those in high school, depending on local school district policies.

In 2014-15, the retention rate for Grades 7-12 was 4.1 percent, a decrease of 0.2 percentage points from the previous year (Table 3). Across secondary grades, retention rates were highest in Grades 9 and 10 (8.6% and 5.6%, respectively) and lowest in Grades 7 and 8 (0.8% each) (Figure 3).

	7			8	(9	10

Grade-Level Retention by Race/Ethnicity

Elementary Grades

Across elementary grades and the five largest racial/ethnic groups, Hispanic students in Grade 1 had the highest retention rate (5.2%), followed by African American students in Grades 1 and 2 (4.9% and 3.5%, respectively) (Figure 4 and Table 4). Asian students in Grades 6 and 4 had the lowest retention rates (0.1% and 0.2%, respectively).

Figure 4 Grade-Level Retention, Grades K-6, by Race/Ethnicity, Texas Public Schools, 2014-15

Note. Racial groups (African American, Asian, White, and multiracial) do not include students of Hispanic ethnicity.

Grade-Level Retention by Race/Ethnicity

Secondary Grades

Across secondary grades and the five largest racial/ethnic groups, African American and Hispanic students in Grade 9 had the highest retention rates (11.9% and 10.5%, respectively), followed by African American students in Grade 10 (7.8%) (Figure 5 and Table 5). Asian students in Grades 7 and 8 and White students in Grade 7 had the lowest retention rates (0.2%, 0.3%, and 0.5%, respectively).

Note. Racial groups (African American, Asian, White, and multiracial) do not include students of Hispanic ethnicity.

Note. A dash (-) indicates data are not reported to protect student anonymity. Racial groups (African American, American Indian, Asian, Pacific Islander, White, and multiracial) do not include students of Hispanic ethnicity.

Grade-Level Retention by Economic Status

Elementary Grades

Under Texas Education Agency (TEA) guidelines, students were identified as economically disadvantaged if they were eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program (TEA, 2015). In every elementary grade, students who were identified as economically disadvantaged had a higher retention rate in 2014-15 than students who were not identified as economically disadvantaged (Figure 6 and Table 6). The rates for economically disadvantaged students were highest in Grade 1 (5.6%) and lowest in Grade 6 (0.9%). Similarly, the rates for non-economically disadvantaged students were highest in kindergarten and Grade 1 (2.0% each) and lowest in Grade 6 (0.3%).

Grade-Level Retention by Economic Status

Secondary Grades

In every secondary grade, students who were identified as economically disadvantaged had a higher retention rate in 2014-15 than students who were not identified as economically disadvantaged (Figure 7 and Table 7). The rates for economically disadvantaged and non-economically disadvantaged students were highest in Grade 9 (11.6% and 4.7%, respectively) and lowest in Grades 7 and 8 (1.1% in both grades and 0.4% in both grades, respectively).

Grade-Level Retention by Gender

Elementary Grades

The retention rate for males was higher than that for females in every elementary grade (Figure 8 and Table 8). Across elementary grades, retention rates for both males and females were highest in Grade 1 (5.1% and 3.5%, respectively) and lowest in Grade 6 (0.9% and 0.4%, respectively).

Secondary Grades

As in the elementary grades, males had a higher retention rate than females in every secondary grade (Figure 9 and Table 9). Across secondary grades, retention rates for both males and females were highest in Grade 9 (10.6% and 6.5%, respectively). The rate for males was lowest in Grade 8 (1.0%), and the rate for females was lowest in Grade 7 (0.6%).

Grade-Level Retention by English Language Learner Status

Elementary Grades

Texas students with limited English proficiency learn English at the same time they learn reading and other language arts skills. Depending on grade level and program availability, most students identified as English language learners (ELLs) are enrolled in bilingual or English as a second language (ESL) programs (Texas Education Code [TEC] §29.053, 2016). ELLs participating in special education receive bilingual or ESL services as part of their special education programs. Although parents can request that a child not receive special language services, in 2014-15, almost 95 percent of all ELLs in the elementary grades participated in bilingual or ESL programs.

In Grades K-6 overall in 2014-15, the retention rate for ELLs was 2.8 percent, compared to 1.8 percent for non-ELLs (Table 10). ELLs overall had a higher rate of retention than non-ELLs in every elementary grade except kindergarten. Among ELLs, the retention rate for students served in bilingual programs was 2.7 percent, and the rate for students served in ESL programs was 2.1 percent (Figure 10). Across elementary grades, retention rates for both ELLs receiving bilingual services and ELLs receiving ESL services were highest in Grade 1 (4.8% and 4.2%, respectively) and lowest in Grade 6 (0.6% and 0.9%, respectively) (Table 10).

Grade-Level Retention by English Language Learner Status

Secondary Grades

In Grades 7-12 overall in 2014-15, the retention rate for ELLs was 8.1 percent, compared to 3.8 percent for non-ELLs (Table 11). ELLs overall had a higher rate of retention than non-ELLs in every secondary grade. Over 93 percent of ELLs in secondary school were served in ESL programs, and the retention rate for these students was 6.7 percent (Figure 11). Across secondary grades, retention rates for ELLs receiving ESL services were highest in Grade 9 (13.9%) and lowest in Grade 7 (1.3%) (Table 11).

Grade-Level Retention of Special Education Students by Primary Disability

Elementary Grades

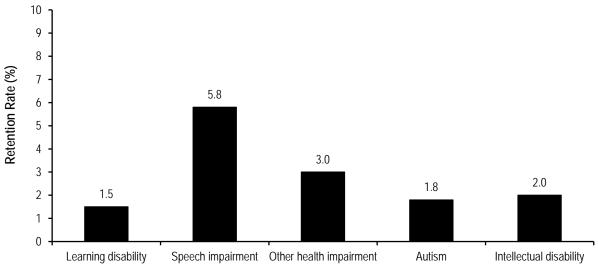

Each student receiving special education services has an individualized education program that is developed by a local admission, review, and dismissal (ARD) committee and that specifies goals and objectives for the year (Title 19 of the Texas Administrative Code [TAC] §89.1055, 2016, amended to be effective January 1, 2015). The student progresses to the next grade level whenever the goals and objectives are met. Retention and promotion policies and practices for students with disabilities vary across Texas districts.

ARDs assign each special education student a primary disability from 1 of 13 categories of disability (TEA, 2015). Among elementary special education students in 2014-15 for whom primary disability information was available, 91.5 percent were assigned a primary disability from 1 of 5 categories: learning disability; speech impairment; other health impairment, such as attention deficit disorder; autism; or intellectual disability (Table 12 on page 44). The same five categories accounted for 92.9 percent of retained elementary special education students for whom primary disability information was available. Across these five categories, retention rates in Grades K-6 overall were highest for students with speech impairments (5.8%), followed by students with other health impairments (3.0%), intellectual disabilities (2.0%), autism (1.8%), and learning disabilities (1.5%) (Figure 12).

Across elementary grades in 2014-15, retention rates for the five most common primary disabilities were highest in kindergarten or first grade (Table 12 on page 44). Rates for students with learning disabilities, other health impairments, intellectual disabilities, and autism were highest in kindergarten (12.9%, 10.2%, 10.0%, and 6.2%, respectively). Rates for students with speech impairments were highest in Grade 1 (9.8%).

Grade-Level Retention of Special Education Students by Primary Disability

Secondary Grades

Among secondary special education students in 2014-15 for whom primary disability information was available, 95.0 percent were assigned a primary disability from 1 of 5 categories: learning disability; other health impairment, such as attention deficit disorder; intellectual disability; autism; or emotional disturbance (Table 13 on page 52). The same five categories accounted for 96.0 percent of retained secondary special education students for whom primary disability information was available. Across these five categories, retention rates in Grades 7-12 overall were highest for students with intellectual disabilities (16.6%), followed by students with emotional disturbance (12.0%), autism (10.1%), other health impairments (8.7%), and learning disabilities (6.3%) (Figure 13).

Across secondary grades in 2014-15, retention rates for students with emotional disturbance or learning disabilities were highest in Grade 9 (25.5% and 15.3%, respectively) (Table 13 on page 52). Rates for students with intellectual disabilities, autism, or other health impairments were highest in Grade 12 (56.2%, 45.7%, and 16.7%, respectively).

Table 13 (continued) Grade-Level Retention of Special Education Students, Grades 7-12, by Grade and Primary Disability, Texas Public Schools, 2011-12 Through 2014-15

Note. Primary disabilities are listed in order of prevalence among all Grade 7-12 students for the most recent school year shown. Totals for primary disabilities may not sum to the total number of students in special education programs because not all students in special education programs were matched to primary disabilities. A dash (–) indicates data are not reported to protect student anonymity. When the number of students retained is not reported, the total number of students is presented in such a manner as to provide a general idea of the number of students in the group while maintaining student anonymity.

Grade-Level Retention by At-Risk, Immigrant, Migrant, and Overage Student Characteristics

Elementary Grades

In 2014-15, a student under the age of 26 was identified as at risk of dropping out of school if his or her circumstances fit 1 of 13 categories defined by TEC §29.081 (2016). Immigrant status applied to individuals, ages 3 through 21, who were not born in the United States and who had not attended more than three years of school in the United States (TEA, 2015). Migrant status applied to students between the ages of 3 and 21 who had changed school districts at least once in the preceding 36 months because of seasonal or temporary farm or fishing work. Based on compulsory school attendance laws in Texas, under which most students begin Grade 1 at the age of six, the age of a student in any specified grade is usually equal to that grade level plus five years. A student whose age on September 1 is higher than his or her grade level plus five years is classified as overage.

In Grades K-6 overall in 2014-15, retention rates for at-risk, immigrant, and migrant students were higher than the state average, whereas the rate for overage students was lower (Table 14). Across elementary grades, rates for at-risk, immigrant, and migrant students were highest in Grade 1 and lowest in Grade 6 (Figure 14 and Table 14). Rates for overage students were highest in Grade 6 and lowest in kindergarten (Table 14).

Grade-Level Retention by At-Risk, Immigrant, Migrant, and Overage Student Characteristics

Secondary Grades

In Grades 7-12 overall in 2014-15, retention rates for at-risk, immigrant, migrant, and overage students were higher than the state average (Table 15). Across secondary grades, rates for at-risk, migrant, and overage students were highest in Grade 9, and the rate for immigrant students was highest in Grade 12 (Figure 15 and Table 15). Rates for at-risk students were lowest in Grades 7 and 8, rates for immigrant and migrant students were lowest in Grade 7, and the rate for overage students was lowest in Grade 8.

Grade-Level Retention by Career and Technical Education, Gifted and Talented, and Title I Program Participation

Elementary Grades

Instructional programs are designed to meet students' different educational needs. Gifted and talented programs offer eligible students a range of learning experiences designed to lead to advanced performance (19 TAC §89.3, 2016, adopted to be effective September 1, 1996). Title I is the largest federal aid program for elementary and secondary schools. The goal of Title I is to improve teaching and learning for students attending schools with high percentages of economically disadvantaged students, particularly those students most at risk of not meeting the state's academic achievement standards. Students counted as participating in Title I programs may be participating in Title I-funded programs, or they may be enrolled in campuses that receive school-wide Title I assistance (TEA, 2015). A coherent sequence of study in career and technical education programs is offered only in Grades 9-12.

In every elementary grade in 2014-15, the retention rate for students participating in gifted and talented programs was lower than the state average, and the rate for students receiving Title I services was higher (Figure 16 and Table 16). Across grades, rates for Title I students were highest in Grade 1 (5.0%) and lowest in Grade 6 (0.8%).

Grade-Level Retention by Career and Technical Education, Gifted and Talented, and Title I Program Participation

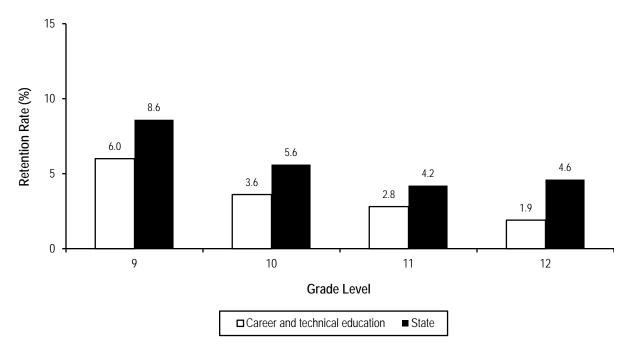

Secondary Grades

In addition to the instructional programs available in the elementary grades, a student in Grades 9-12 can participate in a career and technical education (CTE) program or course of study that includes a coherent sequence of two or more CTE courses. CTE programs offer a range of training designed to help students gain employment in high-skilled, high-wage jobs and advance to postsecondary education.

In each of Grades 9-12 in 2014-15, the retention rate for students participating in CTE programs was lower than the state average (Figure 17 and Table 17). Across Grades 9-12, rates for CTE students were highest in Grade 9 (6.0%) and lowest in Grade 12 (1.9%). The retention rate for students participating in gifted and talented programs was lower than the state average in every secondary grade, and the rate for students receiving Title I services was higher (Table 17). Across secondary grades, rates for gifted and talented students were highest in Grade 9 (0.9%) and lowest in Grades 7 and 8 (0.1% each), and rates for Title I students were highest in Grade 9 (11.3%) and lowest in Grade 8 (1.0%).

Appendix Statute and Rules About Grade-Level Retention and the Student Success Initiative

Texas Education Code §§28.021 and 28.0211

Texas Administrative Code §§101.2001-101.2019

Texas Education Code §§28.021 and 28.0211

The following sections of the Texas Education Code are current through the 84th Legislative Session, 2015.

§28.021. Student Advancement.

- (a) A student may be promoted only on the basis of academic achievement or demonstrated proficiency of the subject matter of the course or grade level.
- (b) In measuring the academic achievement or proficiency of a student who is dyslexic, the student's potential for achievement or proficiency in the area must be considered.
- (c) In determining promotion under Subsection (a), a school district shall consider:
 - (1) the recommendation of the student's teacher;
 - (2) the student's grade in each subject or course;
 - (3) the student's score on an assessment instrument administered under Section 39.023(a), (b), or (l), to the extent applicable; and
 - (4) any other necessary academic information, as determined by the district.
- (d) By the start of the school year, a district shall make public the requirements for student advancement under this section.
- (e) The commissioner shall provide guidelines to districts based on best practices that a district may use when considering factors for promotion.

Added by Acts 1995, 74th Leg., ch. 260, §1, eff. May 30, 1995. Amended by Acts 2009, 81st Leg., R.S., ch. 895 (H.B. 3), §28, eff. June 19, 2009; Acts 2011, 82nd Leg., R.S., ch. 307, (H.B. 2135), §1, eff. June 17, 2011.

§28.0211. Satisfactory Performance on Assessment Instruments Required; Accelerated Instruction.

- (a) Except as provided by Subsection (b) or (e), a student may not be promoted to:
 - (1) the sixth grade program to which the student would otherwise be assigned if the student does not perform satisfactorily on the fifth grade mathematics and reading assessment instruments under Section 39.023; or
 - (2) the ninth grade program to which the student would otherwise be assigned if the student does not perform satisfactorily on the eighth grade mathematics and reading assessment instruments under Section 39.023.
- (a-1) Each time a student fails to perform satisfactorily on an assessment instrument administered under Section 39.023(a) in the third, fourth, fifth, sixth, seventh, or eighth grade, the school district in which the student attends school shall provide to the student accelerated instruction in the applicable subject area. Accelerated instruction may require participation of the student before or after normal school hours and may include participation at times of the year outside normal school operations.
- (a-2) A student who fails to perform satisfactorily on an assessment instrument specified under Subsection (a) and who is promoted to the next grade level must complete accelerated

instruction required under Subsection (a-1) before placement in the next grade level. A student who fails to complete required accelerated instruction may not be promoted.

- (a-3) The commissioner shall provide guidelines to districts on research-based best practices and effective strategies that a district may use in developing an accelerated instruction program.
- (b) A school district shall provide to a student who initially fails to perform satisfactorily on an assessment instrument specified under Subsection (a) at least two additional opportunities to take the assessment instrument. A school district may administer an alternate assessment instrument to a student who has failed an assessment instrument specified under Subsection (a) on the previous two opportunities. Notwithstanding any other provision of this section, a student may be promoted if the student performs at grade level on an alternate assessment instrument under this subsection that is appropriate for the student's grade level and approved by the commissioner.
- (c) Each time a student fails to perform satisfactorily on an assessment instrument specified under Subsection (a), the school district in which the student attends school shall provide to the student accelerated instruction in the applicable subject area, including reading instruction for a student who fails to perform satisfactorily on a reading assessment instrument. After a student fails to perform satisfactorily on an assessment instrument a second time, a grade placement committee shall be established to prescribe the accelerated instruction the district shall provide to the student before the student is administered the assessment instrument the third time. The grade placement committee shall be composed of the principal or the principal's designee, the student's parent or guardian, and the teacher of the subject of an assessment instrument on which the student failed to perform satisfactorily. The district shall notify the parent or guardian of the time and place for convening the grade placement committee and the purpose of the committee. An accelerated instruction group administered by a school district under this section may not have a ratio of more than 10 students for each teacher.
- (d) In addition to providing accelerated instruction to a student under Subsection (c), the district shall notify the student's parent or guardian of:
 - (1) the student's failure to perform satisfactorily on the assessment instrument;
 - (2) the accelerated instruction program to which the student is assigned; and
 - (3) the possibility that the student might be retained at the same grade level for the next school year.
- (e) A student who, after at least three attempts, fails to perform satisfactorily on an assessment instrument specified under Subsection (a) shall be retained at the same grade level for the next school year in accordance with Subsection (a). The student's parent or guardian may appeal the student's retention by submitting a request to the grade placement committee established under Subsection (c). The school district shall give the parent or guardian written notice of the opportunity to appeal. The grade placement committee may decide in favor of a student's promotion only if the committee concludes, using standards adopted by the board of trustees, that if promoted and given accelerated instruction, the student is likely to perform at grade level. A student may not be promoted on the basis of the grade placement committee's decision unless that decision is unanimous. The commissioner by rule shall establish a time line for making the placement determination. This subsection does not create a property interest in promotion. The decision of the grade placement committee is final and may not be appealed.

- (f) A school district shall provide to a student who, after three attempts, has failed to perform satisfactorily on an assessment instrument specified under Subsection (a) accelerated instruction during the next school year as prescribed by an educational plan developed for the student by the student's grade placement committee established under Subsection (c). The district shall provide that accelerated instruction regardless of whether the student has been promoted or retained. The educational plan must be designed to enable the student to perform at the appropriate grade level by the conclusion of the school year. During the school year, the student shall be monitored to ensure that the student is progressing in accordance with the plan. The district shall administer to the student the assessment instrument for the grade level in which the student is placed at the time the district regularly administers the assessment instruments for that school year.
- (g) This section does not preclude the retention at a grade level, in accordance with state law or school district policy, of a student who performs satisfactorily on an assessment instrument specified under Subsection (a).
- (h) In each instance under this section in which a school district is specifically required to provide notice to a parent or guardian of a student, the district shall make a good faith effort to ensure that such notice is provided either in person or by regular mail and that the notice is clear and easy to understand and is written in English or the parent or guardian's native language.
- (i) The admission, review, and dismissal committee of a student who participates in a district's special education program under Subchapter B, Chapter 29, and who does not perform satisfactorily on an assessment instrument specified under Subsection (a) and administered under Section 39.023(a) or (b) shall determine:
 - (1) the manner in which the student will participate in an accelerated instruction program under this section; and
 - (2) whether the student will be promoted or retained under this section.
- (j) A school district or open-enrollment charter school shall provide students required to attend accelerated programs under this section with transportation to those programs if the programs occur outside of regular school hours.
- (k) The commissioner shall adopt rules as necessary to implement this section, including rules concerning when school districts shall administer assessment instruments required under this section and which administration of the assessment instruments will be used for purposes of Section 39.054.
- (l) Repealed by Acts 2007, 80th Leg., R.S., ch. 1058, §17, eff. June 15, 2007.
- (1-1) The commissioner may adopt rules requiring a school district that receives federal funding under Title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. Section 6301 et seq.) to use that funding to provide supplemental educational services under 20 U.S.C. Section 6316 in conjunction with the accelerated instruction provided under this section, provided that the rules may not conflict with federal law governing the use of that funding.
- (m) The commissioner shall certify, not later than July 1 of each school year or as soon as practicable thereafter, whether sufficient funds have been appropriated statewide for the purposes of this section and Section 28.0217. A determination by the commissioner is final and may not be appealed. For purposes of certification, the commissioner shall consider:
 - (1) the average cost per student per assessment instrument administration;

- (2) the number of students that require accelerated instruction because the student failed to perform satisfactorily on an assessment instrument;
- (3) whether sufficient funds have been appropriated to provide support to students in grades three through 12 identified as being at risk of dropping out of school, as defined in Section 29.081(d); and
- (4) whether sufficient funds have been appropriated to provide instructional materials that are aligned with the assessment instruments under Sections 39.023(a) and (c).
- (m-1) For purposes of certification under Subsection (m), the commissioner may not consider Foundation School Program funds except for compensatory education funds under Section 42.152. This section may be implemented only if the commissioner certifies that sufficient funds have been appropriated during a school year for administering the accelerated instruction programs specified under this section and Section 28.0217, including teacher training for that purpose.
- (n) A student who is promoted by a grade placement committee under this section must be assigned in each subject in which the student failed to perform satisfactorily on an assessment instrument specified under Subsection (a) to a teacher who meets all state and federal qualifications to teach that subject and grade.
- (o) This section does not require the administration of a fifth or eighth grade assessment instrument in a subject under Section 39.023(a) to a student enrolled in the fifth or eighth grade, as applicable, if the student:
 - (1) is enrolled in a course in the subject intended for students above the student's grade level and will be administered an assessment instrument adopted or developed under Section 39.023(a) that aligns with the curriculum for the course in which the student is enrolled; or
 - (2) is enrolled in a course in the subject for which the student will receive high school academic credit and will be administered an end-of-course assessment instrument adopted under Section 39.023(c) for the course.
- (p) Notwithstanding any other provision of this section, a student described by Subsection (o) may not be denied promotion on the basis of failure to perform satisfactorily on an assessment instrument not required to be administered to the student in accordance with that subsection.

Texas Administrative Code §§101.2001-101.2019

The following sections of the Texas Administrative Code are current as of June 2016.

Statutory Authority: The provisions of this Subchapter BB issued under the Texas Education Code, §\$28.021, 28.0211, 28.0213, 39.023, and 39.025(b-1), unless otherwise noted.

§101.2001. Policy.

- (a) School districts shall implement grade advancement requirements in accordance with this subchapter and the Texas Education Agency (TEA) procedures outlined in the official Student Success Initiative manual, published annually by the TEA. As specified in §101.2009 of this title (relating to Notice to Parents or Guardians), school districts will make public at the beginning of the school year grade advancement requirements as determined by the school district.
- (b) In addition to local policy relating to grade advancement, except in cases where a student is testing above grade level as specified in the Texas Education Code (TEC), §28.0211(o), a student in Grade 5 or Grade 8 shall demonstrate proficiency in reading and mathematics as required by the TEC, §28.0211(a), in order to advance to the next grade. The assessment grade promotion requirements of the TEC, §28.0211(a), shall be in effect beginning with the 2012-2013 school year. Demonstrated proficiency is defined under this section as meeting the satisfactory passing standard on the appropriate assessment instruments specified by §101.2003(a) of this title (relating to Grade Advancement Testing Requirements) or on a state-approved alternate assessment authorized in §101.2011 of this title (relating to Alternate Assessment). The standard in place when a student first takes a Grade 5 or Grade 8 mathematics or reading assessment is the standard that will be maintained for all subsequent retest opportunities for that student. A student who does not demonstrate proficiency as described in this section may advance to the next grade only if:
 - (1) the student has completed the required accelerated instruction under \$101.2006 of this title (relating to Accelerated Instruction);
 - (2) the student's Grade Placement Committee (GPC), as specified in §101.2007 of this title (relating to Role of Grade Placement Committee), determines by unanimous decision, in accordance with the standards for promotion established by the local school board, that the student is likely to perform at grade level at the end of the next year given additional accelerated instruction. In accordance with the TEC, §28.021, to determine grade promotion, a school district is required to consider the recommendation of the student's teacher, the student's grades, the student's assessment scores, and any other necessary academic information; and
 - (3) in accordance with the TEC, §28.0211(n), the school district will ensure that a student who is promoted by a GPC under §101.2007 of this title shall be assigned in each subject in which the student failed to perform satisfactorily on an assessment instrument specified under the TEC, §28.0211(a), to a teacher who meets all state and federal qualifications to teach that subject and grade.
- (c) Students shall be provided accelerated instruction required by the TEC, §28.0211 and §39.025(b-1), as specified in §101.2006 of this title.

(d) A student in Grade 5 or Grade 8 may not be denied promotion to the next grade on the basis of failure to perform satisfactorily on a reading or mathematics assessment instrument intended for use above the student's grade level.

Source: The provisions of this §101.2001 adopted to be effective May 26, 2002, 27 TexReg 4337; amended to be effective April 19, 2010, 35 TexReg 3030; amended to be effective June 4, 2012, 37 TexReg 4040; amended to be effective February 26, 2014, 39 TexReg 1149.

§101.2003. Grade Advancement Testing Requirements.

- (a) Except in cases where a student is testing above grade level as specified in the Texas Education Code (TEC), §28.0211(o), each school district and charter school shall test eligible students in accordance with the grade advancement requirements for the grades and subjects specified in the TEC, §28.0211(a). The assessment grade promotion requirements of the TEC, §28.0211(a), shall be in effect beginning with the 2012-2013 school year. These requirements apply to the following assessment instruments under the TEC, §39.023(a), (b), and (l):
 - (1) the reading and mathematics assessments at Grade 5; and
 - (2) the reading and mathematics assessments at Grade 8.
- (b) An eligible student is subject to all of the grade advancement requirements under the TEC, §28.0211, including automatic retention, if the student is enrolled in a local school district or charter school on any day between January 1 and the date of the first administration of the grade advancement assessments, unless a student is administered an assessment instrument intended for use above the student's grade level as specified in the TEC, §28.0211(o). A student is only eligible to take an assessment instrument intended for use above the student is receiving instruction in the entire curriculum for that subject.
- (c) An eligible student who does not meet the criteria specified in subsection (b) of this section but enrolls in a local school district or charter school at any time after the date of the first administration of the grade advancement assessments is not subject to the grade advancement requirements. In accordance with §101.2001(b) of this title (relating to Policy), a school district or charter school must provide this student with the opportunity to test and access to required accelerated instruction.
- (d) A student receiving special education services under the TEC, Chapter 29, Subchapter A, enrolled in Grade 5 or Grade 8 who is receiving instruction in the essential knowledge and skills in a subject specified under subsection (a) of this section is eligible under this section as outlined in the official Student Success Initiative manual published annually by the Texas Education Agency (TEA). In accordance with the TEC, §28.0211(i), the student's admission, review, and dismissal (ARD) committee shall determine appropriate assessment and accelerated instruction for each eligible student. Assessment decisions must be made on an individual basis and in accordance with procedures established by the TEA. These decisions shall be documented in the student's individualized education program.
- (e) An English language learner (ELL), as defined by the TEC, Chapter 29, Subchapter B, who is administered an assessment in English or Spanish for a grade and subject specified in subsection (a) of this section, except as provided by §101.1005 of this title (relating to Assessments of Achievement in Academic Content Areas and Courses), is eligible under this section. In accordance with §101.1005(a) of this title, the student's language proficiency assessment committee (LPAC) shall determine the appropriate assessment and accelerated instruction for each eligible student. The Grade Placement Committee, as specified in

\$101.2007 of this title (relating to Role of Grade Placement Committee), shall make its decisions in consultation with a member of the student's LPAC. Assessment decisions must be made on an individual basis and in accordance with procedures established by the TEA.

- (f) As specified in §101.1005 of this title, decisions regarding assessments for ELLs who receive special education services shall be made by the ARD committee in conjunction with the LPAC.
- (g) In accordance with the TEC, §28.021(b), decisions regarding a student who has dyslexia and is eligible under this section shall consider the student's potential for achievement or proficiency in the assessed subject.

Source: The provisions of this §101.2003 adopted to be effective May 26, 2002, 27 TexReg 4337; amended to be effective February 24, 2005, 30 TexReg 842; amended to be effective April 19, 2010, 35 TexReg 3030; amended to be effective June 4, 2012, 37 TexReg 4040; amended to be effective February 26, 2014, 39 TexReg 1149.

§101.2005. Test Administration and Schedule.

- (a) The Texas Education Agency (TEA) shall establish the test administration procedures in the applicable test administration materials. The superintendent of each school district and chief administrative officer of each charter school shall be responsible for following these procedures and maintaining the integrity of the test administration and the security and confidentiality requirements, as specified in Chapter 101, Subchapter C, of this title (relating to Security and Confidentiality).
- (b) The TEA shall provide three opportunities per year for the tests required for grade advancement as specified in the Texas Education Code, §28.0211(a). The commissioner of education shall specify the dates of these administrations in the assessment calendar. Additional test opportunities will not be provided.
- (c) The superintendent of each school district and chief administrative officer of each charter school shall establish procedures to ensure:
 - (1) that each eligible student who is absent or does not receive a test score for any test administration shall receive appropriate accelerated instruction as warranted on an individual student basis; and
 - (2) that each eligible student who is absent or does not receive a test score for all three test opportunities and is consequently retained shall receive other appropriate means of evaluation, including the administration of an alternate assessment, as provided under §101.2011(a) of this title (relating to Alternate Assessment), so that the Grade Placement Committee has sufficient evidence for its review upon appeal by a parent or guardian.
- (d) A campus or district must accommodate the request of an out-of-district student to participate in the third administration of a test required for grade advancement if that campus or district is testing one or more local students on the applicable test and if the out-of-district student has registered to take the test by a date determined by the TEA.

Source: The provisions of this §101.2005 adopted to be effective May 26, 2002, 27 TexReg 4337; amended to be effective February 24, 2005, 30 TexReg 842.

§101.2006. Accelerated Instruction.

- (a) Each time a student fails to perform satisfactorily on an assessment instrument administered under the Texas Education Code (TEC), §39.023(a), (b), or (c), the school district or charter school shall provide the student with accelerated instruction in the applicable subject. A student failing to perform satisfactorily on an end-of-course assessment under the TEC, §39.023(c), must be provided the appropriate accelerated instruction before the next administration of the applicable assessment as specified by the TEC, §29.081(b-1).
- (b) Accelerated instruction may require participation of the student before or after normal school hours and may include participation at times of the year outside normal school operations. Each school district and each charter school shall be responsible for providing transportation to students required to attend accelerated instruction programs if these programs occur outside of regular school hours.
- (c) A school district must accommodate the request of an out-of-district student to participate in any established, on-campus summer accelerated instruction program, provided the student is living away from his or her home district and the program matches the accelerated instruction prescribed by the student's Grade Placement Committee.
- (d) Accelerated instruction shall be based on, but not limited to, guidelines on research-based best practices and effective strategies as outlined in the Student Success Initiative manual, published annually by the TEA, which districts may use for developing accelerated instruction.
- (e) In addition, for students who are administered state assessments specified under the TEC, §28.0211(a):
 - a student who fails to perform satisfactorily on an assessment instrument specified under the TEC, §28.0211(a), shall be provided accelerated instruction before the next administration of the applicable assessment as specified by the TEC, §28.0211. A student shall be assigned to an accelerated instruction group that does not have a ratio larger than ten students for each teacher; and
 - (2) a student who fails to perform satisfactorily on an assessment instrument specified under the TEC, §28.0211(a), after the first, second, and third testing opportunities and who is promoted to the next grade level must complete, in accordance with state and local school board policy, all the accelerated instruction required under this section before placement in the next grade level. A student who fails to complete all the required accelerated instruction may not be promoted.

Source: The provisions of this §101.2006 adopted to be effective April 19, 2010, 35 TexReg 3030; amended to be effective June 4, 2012, 37 TexReg 4040; amended to be effective February 26, 2014, 39 TexReg 1149.

§101.2007. Role of Grade Placement Committee.

(a) In accordance with the Texas Education Code (TEC), §28.0211, the superintendent of each school district and chief administrative officer of each charter school shall establish procedures for convening a Grade Placement Committee (GPC) for each eligible student who fails to demonstrate proficiency on the second administration of the assessment required for grade advancement. In accordance with §101.2006(d) of this title (relating to Accelerated Instruction), decisions by the GPC shall be made on an individual student basis, address required participation of the student in accelerated instruction, and ensure the most effective instruction to support the student's academic achievement on grade level.

- (b) The GPC shall be composed of the principal or principal's designee, the student's parent or guardian, and the student's teacher(s) of the subject of the grade advancement assessment(s) on which the student has failed to demonstrate proficiency. If this teacher is unavailable, the principal shall designate to serve on the GPC a teacher certified in the subject of the assessment on which the student failed to perform satisfactorily and who is most familiar with the student's performance in that subject area. If more than one parent or guardian has the authority to make educational decisions regarding the student, a good faith effort must be made to notify both parents, but participation of any one parent or guardian is sufficient. Either parent or only one guardian may initiate an appeal. If both parents or guardians serve on the GPC but do not agree, either may agree to promote the student if the remaining members of the GPC also agree to the promotion. The district may accept a parent's or guardian's written designation of another individual to serve on the GPC for all purposes. The district may accept a parent's or guardian's written and signed waiver of participation in the GPC and designation of the remaining members of the GPC as the decision-making entity for all purposes.
 - (1) If a parent or guardian or designee is unable to attend a meeting, the district may use other methods to ensure parent participation, including individual and conference telephone calls. The district may designate an individual to act on behalf of the student in place of a parent, guardian, or designee if no such person can be located. A surrogate parent named to act on behalf of a student with a disability shall be considered a parent for purposes of the TEC, §28.0211.
 - (2) The district shall make a good faith effort to notify a parent or guardian to attend the GPC. If a parent or guardian is unavailable, the remaining members of the GPC must convene as required by this section and take all necessary actions, except that the GPC may not agree to promote a student under the TEC, §28.0211(e), unless a parent, guardian, or designee has appealed. A district may allow an appeal to be filed in writing in lieu of attending the GPC.
- (c) Within five working days of receipt of student assessment results for the second administration of the assessment required for grade advancement, the district shall notify the campus principal of student assessment results for each eligible student who fails to demonstrate proficiency. Upon receipt of this notice, the principal shall notify the teacher and parent or guardian of the assessment results. This notice shall include a description of the purpose and responsibilities of the GPC and the time and place for the GPC to hold its first meeting.
- (d) In accordance with §101.2006(d) of this title, the GPC is responsible for prescribing the accelerated instruction the student is to receive before the third testing opportunity. The GPC shall also decide at this time whether the student shall take the assessment specified in §101.2003 of this title (relating to Grade Advancement Testing Requirements) or the alternate assessment, as authorized by §101.2011 of this title (relating to Alternate Assessment). In the absence of unanimous agreement, the student shall take the assessment specified in §101.2003 of this title.
- (e) The GPC must convene again if a student fails to demonstrate proficiency on the third administration of an assessment required for grade advancement and is thereby automatically retained at the same grade level. Within five working days of receipt of student assessment results for this administration, the district shall notify the principal or principal's designee of student assessment results for each eligible student who fails to demonstrate proficiency. Upon receipt of this notice from the district, the principal shall inform the teacher and parent or guardian of the time and place for the GPC to hold a meeting. This notice shall inform the

parent or guardian of the opportunity to appeal the automatic retention of the student. The district shall establish a procedure to ensure a good faith effort is made toward securing the parent's or guardian's receipt of the retention notification. The parent or guardian may appeal the retention by submitting a request to the GPC within five working days of receipt of this retention notification.

- (f) If an appeal has been initiated by the parent or guardian, the GPC may decide in favor of promotion only if the GPC concludes, upon review of all facts and circumstances and in accordance with standards adopted by the local school board, that the student is likely to perform on grade level given additional accelerated instruction during the next school year. A student may be promoted only if the GPC's decision is unanimous and the student has completed all required accelerated instruction specified in §101.2006 of this title. The review and final decision of the GPC must be appropriately documented as meeting the standards adopted by the local school board and made in conformance with procedures specified in the Student Success Initiative manual and as required by §101.2001(b) of this title (relating to Policy). These standards must include consideration of the following:
 - (1) the recommendation of the student's teacher;
 - (2) the student's grades;
 - (3) the student's assessment scores; and
 - (4) any other necessary academic information as determined by the district.
- (g) In accordance with the TEC, §28.0211(e), the placement decision by the GPC shall be made before the start of the next school year or, if applicable, upon reenrollment of a student after this date.
- (h) A student who has been promoted upon completion of a school year in a school other than a Texas public school may be enrolled in that grade without regard to whether the student has successfully completed an assessment required under the TEC, §28.0211. This subsection does not limit the authority of a district to appropriately place a student under the TEC, Chapter 25, Subchapter B.
- (i) In addition to the placement decision, the GPC shall develop an accelerated instruction plan for each student who does not pass after three testing opportunities, regardless of whether the student has been promoted or retained. This plan shall include the accelerated instruction that the district must provide during the next school year. The plan must be designed to enable the student to perform at the appropriate grade level by the end of the next school year. The district shall establish a policy for monitoring the student during the school year to ensure that the student is progressing in accordance with the plan. The accelerated instruction plan must provide for interim progress reports to the student's parent or guardian and the opportunity for consultation with the teacher and/or principal as needed.

Source: The provisions of this §101.2007 adopted to be effective May 26, 2002, 27 TexReg 4337; amended to be effective February 24, 2005, 30 TexReg 842; amended to be effective April 19, 2010, 35 TexReg 3030; amended to be effective February 26, 2014, 39 TexReg 1149.

§101.2009. Notice to Parents or Guardians.

- (a) The superintendent of each school district or chief administrative officer of each charter school shall notify parents or guardians of the grade advancement requirements at the beginning of the school year.
- (b) The district shall provide early notice to parents or guardians of students identified in a preceding grade to be at risk of failure on the first administration of the assessment

required for grade advancement the next year. The superintendent must establish the instruments/procedures to be used to make this determination. This notice shall include accelerated instruction participation requirements as stipulated by §101.2006 of this title (relating to Accelerated Instruction) and be provided before the end of the school year preceding the grade advancement requirements.

- (c) The district shall establish procedures to notify the parent or guardian of a student who has failed to demonstrate proficiency on the first administration of a grade advancement assessment. This notification should be made within five working days of district receipt of student assessment results from this administration. This notice shall include the student's assessment results, a description of the grade advancement policy, the required accelerated instruction to which the student has been assigned under §101.2006 of this title, and the possibility that the student might be retained at the same grade level for the next school year. In addition, the notice shall encourage parents or guardians to meet immediately with the student's teacher to outline mutual responsibilities to support the student during accelerated instruction.
- (d) Whenever the district is required to notify a parent or guardian about the requirements related to promotion and accelerated instruction under §101.2006 of this title for students at risk of retention, including the notification requirements for the Grade Placement Committee under §101.2007 of this title (relating to Role of Grade Placement Committee), the district shall make a good faith effort to ensure that the notice is provided either in person or by regular mail, is clear and easy to understand, and is written in English or in the parent's or guardian's native language.

§101.2011. Alternate Assessment.

- (a) On the third testing opportunity, each school district and charter school may establish by local board policy a district-wide procedure to use a state-approved alternate assessment instead of the statewide assessment instrument specified in §101.2003(a) of this title (relating to Grade Advancement Testing Requirements). The commissioner of education shall provide annually, to school districts and charter schools, a list of state-approved group-administered achievement tests, if available, certified by test publishers as meeting the requirements of the Texas Education Code, §28.0211. This list shall include nationally recognized instruments for obtaining valid and reliable data, which demonstrate student competencies in the applicable subject at the appropriate grade level range. The district shall select only one test for each applicable grade and subject to be used under this section.
- (b) The alternate assessment must be given during the period established in the assessment calendar by the commissioner of education to coincide with the date of the third administration of the statewide assessment.
- (c) A company or organization scoring a test defined in subsection (a) of this section shall send test results to the school district for verification within ten working days following receipt of the test materials from the school district and shall send a copy of those results to the Texas Education Agency (TEA) in a format specified by and on a schedule established by the TEA.
- (d) To maintain the security and confidential integrity of group-administered achievement tests, school districts and charter schools shall follow the procedures for test security and

confidentiality delineated in Subchapter C of this chapter (relating to Security and Confidentiality).

§101.2015. Parental Waiver.

The superintendent of each school district and chief administrative officer of each charter school shall establish a waiver process by which a parent or guardian may request that a student not participate in the third test opportunity due to potential harm to the student. The waiver must provide documentation of potential harm, student need, and other appropriate information. If a parental waiver is granted, the student must still participate in all required acceleration and is subject to retention based on the failure on the second test administration.

§101.2017. Scoring and Reporting.

In accordance with \$101.3014 of this title (relating to Scoring and Reporting), the scoring contractor will provide school districts with the results of the assessments required by the Texas Education Code, \$28.0211, or, if applicable, the results of the alternate assessment specified in \$101.2011 of this title (relating to Alternate Assessment), within ten working days following the receipt of the test materials from the school district or charter school.

§101.2019. Credit for High School Graduation.

- (a) Students who have been retained in Grade 8 in accordance with the grade advancement testing requirements may earn course credit for high school graduation during the next school year in subject areas other than the required courses in the subject area which caused the student to be retained.
- (b) The school board of each district and each charter school may establish a policy that provides for the placement of retained students in an age-appropriate learning environment. In accordance with local grade configurations for elementary, middle, and high school campuses, this policy may specify the age by which a retained student should be placed on the next level campus even though not yet promoted to the grade of that campus.

Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

- 1. acceptance policies on student transfers from other school districts;
- 2. operation of school bus routes or runs on a nonsegregated basis;
- 3. nondiscrimination in extracurricular activities and the use of school facilities;
- 4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
- 5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
- 6. nondiscriminatory practices relating to the use of a student's first language; and
- 7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
